**Gregory R. Pierce,I.G. Sarason**

**Social Support** Alan Vaux,1988-09-26 Within the last decade, social support has become an increasingly popular research topic among professionals in the social sciences. Many empirical studies on social support appeared initially, only to be followed by a spate of theoretical articles attempting to make sense of the growing research literature. A need arose for an integrative overview of both theoretical and practical considerations expressing a consistent perspective on the many unresolved issues in the field. Social Support comprehensively evaluates research and theory from the perspective of both the scientist and human service provider.

Social Support: Theory, Research and Applications I.G. Sarason,2013-11-11 No one is rich enough to do without a neighbor. Traditional Danish Proverb This bit of Danish folk wisdom expresses an idea underlying much of the current thinking about social support. While the clinical literature has for a long time recognized the deleterious effects of unwholesome social relationships, only more recently has the focus broadened to include the positive side of social interaction, those interpersonal ties that are desired, rewarding, and protective. This book contains theoretical and research contributions by a group of scholars who are charting this side of the social spectrum. Evidence is increasing that maladaptive ways of thinking and behaving occur disproportionately among people with few social supports. Rather than sapping self-reliance, strong ties with others particularly family members seem to encourage it. Reliance on others and self-reliance are not only compatible but complementary to one another. While the mechanism by which an intimate relationship is protective has yet to be worked out, the following factors seem to be involved: intimacy, social integration through shared concerns, reassurance of worth, the opportunity to be nurtured by others, a sense of reliable alliance, and guidance. The major advance that is taking place in the literature on social support is that reliance is being -placed less on anecdotal and clinical evidence and more on empirical inquiry. The chapters of this book reflect this important development and identify the frontiers that are currently being explored.

Social Support Measurement and Intervention Sheldon Cohen,Lynn G. Underwood,Benjamin H. Gottlieb,2000 The information provided on both measurement and intervention will also be valuable to practitioners interested in designing and evaluating prevention and treatment initiatives.--BOOK JACKET.

Handbook of Social Support and the Family Gregory R. Pierce,I.G. Sarason,2013-06-29 While insights sometimes are slow

in coming, they often seem obvious when they finally arrive. This handbook is an outcome of the insight that the topics of social support and the family are very closely linked. Obvious as this might seem, the fact remains that the literatures dealing with social support and the family have been deceptively separate and distinct. For example, work on social support began in the 1970s with the accumulation of evidence that social ties and social integration play important roles in health and personal adjustment. Even though family members are often the key social supporters of individuals, relatively little research of social support was targeted on family interactions as a path to specifying supporter processes. It is now recognized that one of the most important features of the family is its role in providing the individual with a source of support and acceptance. Fortunately, in recent years, the distinctness and separateness of the fields of social support and the family have blurred. This handbook provides the first collation and integration of social support and family research. This integration calls for specifying processes (such as the cognitions associated with poor support availability and unrewarding family constellations) and factors (such as cultural differences in family life and support provision) that are pertinent to integration.

**Social Support** Barbara R. Sarason, Irwin G. Sarason, Gregory R. Pierce, 1990-05-02 Focuses on one of the fastest-growing areas of psychological research and application, that of social support and its relevance to socialization, development and clinical concerns. Included are up-to-date findings on assessment of social support, the contribution of social support to personal relationships, its importance in personality development, applications in dealing with stressful situations, practical applications in prevention and therapeutic intervention in clinical and community settings. Approaches discussed include clinical and field studies, experimental investigations and empirical inquiries that take a life-span developmental perspective.

**Middle Range Theories** Sandra J. Peterson, Timothy S. Bredow, 2009 This groundbreaking text is the most complete and detailed book devoted to middle-range theories and their applications in clinical nursing research. The book thoroughly explains the process of selecting an appropriate theory for a particular nursing research study and sets forth criteria for critiquing theories. Each chapter includes examples of research using middle-range theories, definitions of key terms, analysis exercises, reference lists, and relevant Websites. Instruments are presented in appendices. New features of this edition include analysis questions for all theories; new chapters on learning theory and physiologic middle-range theories; Part introductions to frame the selection process for each middle-range theory chosen; and a glossary of terms.

*The Handbook of Group Communication Theory and Research* Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field, documenting and synthesizing the work done in group communication's 50-year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological

practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research Individuals and group communication Task and relational group communication Group communication processes Group communication facilitation Group communication contexts and applications The sections serve as a crossroads where various paths pursued in each area meet, summarize and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research, and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.

**Digital Geographies—Theory, Space, and Communities** Abdul Shaban, 2025-01-02 This machine-generated volume, with chapter introductions by the human expert, showcases how digital technologies are having deep transformative impacts on geographies and temporalities of social, political, economic, and personal lives. They are altering perceptions and physicality of space and time. They are giving birth to digital communities and societies where distance remains of little significance. Virtual spaces and ICT have disrupted state sovereignties, often liquidating their physical national boundaries. The rise of the digital economy shows that new important raw materials for the future are information rather than coal, oil, and minerals. Digitalisation is also leading to several contradictory processes of democratisation, rising welfare of the citizens, as well as surveillance, peripheralisation and exclusion. States are taking pride in digitalising their services to the citizens, with massive consequences on the welfare of those facing digital divides. As a departure to, and in addition to, the usual understanding of digitalisation, society, and space, the present volume engages with some of the critical questions while reviewing existing literature: What are the space relations of digital technologies? What are the forms and consequences of changing physical space-human relations to digital-space-human relations? How is the sense of time and space changing with pervasive performatives of ‘in real-time’ and ‘virtual realities’ or with perceptible or portable spaces? In what ways does digitalisation relate to knowledge and power? Why and how must we theorise the digitalisation-led transformative processes of sociality, materiality and their spatialities? The book will be useful for teachers, researchers, and students engaged in this new area of digital geography, especially in social science and its subfields of sociology, economics, political sciences, anthropology, psychology, development studies, policy studies, social work, urban studies, and planning. For the full picture, the volume can be read in combination with its companion volume on ‘Digital Geographies - Urbanisation, Economy and Modelling’.

**Handbook of Foster Youth** Elizabeth Trejos-Castillo, Nancy Trevino-Schafer, 2018-03-22 Currently, there are over 400,000 youth living in foster care in the United States, with over 20,000 aging out of the child welfare system each year. Foster youth are more prone to experience short- and long-term adverse developmental outcomes including diminished academic achievement and career opportunities, poor mental and overall health, financial struggles, homelessness, early

sexual intercourse, and substance abuse, many of these outcomes are risk factors for involvement in the juvenile justice system. Despite their challenges, foster youth have numerous strengths and positive assets that carry them through their journeys, helping them to overcome obstacles and build resilience. The Handbook of Foster Youth brings together a prominent group of multidisciplinary experts to provide nuanced insights on the complex dynamics of the foster care system, its impact on youth's lives, and the roles of institutions and policies in the foster system. It discusses current gaps and future directions as well as recommendations to advance the field. This book provides an opportunity to reflect on the many challenges and strengths of foster youth and the child welfare system, and the combined efforts of caregivers, community volunteers, policy makers, and the professionals and researchers who work with them.

It further devotes a section to the most current and innovative methodological issues. Chapters are updated providing an inclusive discussion of the current research and the theoretical and empirical future of crime and deviance. This handbook is of great interest for advanced undergraduates, graduates students, researchers and scholars in criminology, criminal justice, sociology and related fields, such as social welfare, economics, and psychology.

**Risk Factors in Depression** Keith S. Dobson, David J. A. Dozois, 2011-09-02 Depression is one of the most common mental health disorders, affecting 14% of all people at some point in their lifetime. Women are twice as likely to become depressed as men, but beyond gender there are a variety of risk factors that influence the prevalence and likelihood of experiencing depression. Risk Factors in Depression consolidates research findings on risk factors into one source, for ease of reference for both researchers and clinicians in practice. The book divides risk factors into biological, cognitive, and social risk factors. This provides researchers with the opportunity to examine the interface among different theoretical perspectives and variables, and to look for the opportunity for more complex and explanatory models of depression. - Allows reader to compare and contrast the relative states of development of different models and their databases - Examines the predictive power of these models related to various phases of clinical depression, including onset, maintenance, and relapse - Provides an examination of the therapeutic implications of comprehensive and integrative models of depression

**Criminological Theory** Francis T. Cullen, Robert Agnew, 2003 This text is a comprehensive anthology in which criminologists Cullen and Agnew take readers from past to present, reviewing classic and contemporary theories of crime.

This new edition features 14 new selections, ranging from classic works to recent selections on social disorganization, and control balance theories.

**Personal Relationships and Social Support** Steve Duck, Roxane Cohen Silver, 1990 It is widely acknowledged that the support given by friends, intimates and other members of a social network is important to a person's well-being. Until recently, however, little attention has been paid to the relational processes and contexts through which social support is mediated. *Personal Relationships and Social Support* represents a major initiative in its focus upon social support as a phenomenon embedded in the everyday transactions and dynamics of people's interpersonal relationships. The authors consider such issues as the importance of the day-to-day talk of social support within interpersonal relationships, the strategies that people use to mobilize support within particular relational contexts and the impact of people's daily life and work patterns on the need for, and ability to mobilize, support. The effect, in turn, of competence in support giving on the development and maintenance of interpersonal relationships is examined as are the possible negative consequences of particular kinds of support. *Personal Relationships and Social Support* brings together for the first time two strands of work, on social support and the nature of interpersonal relationships, which have tended to develop in isolation from each other. This path-breaking book will be essential reading for all those interested in new developments in theory and research in the field of human relationships.

**System of Positive Polity: Social statics; or, The abstract theory of human order** Auguste Comte, 1875

A Social Theory of Religious Education George Albert Coe, 1917

*Social Support and Health* Sheying Chen, 2013 The relationship between social support and health has attracted tremendous research interest during the past few decades. This book is the newest addition to the literature with an emphasis on the study of diverse populations from a global perspective. Aiming at theoretical and methodological advancement, it also makes a significant contribution by addressing some fundamental issues in social and behavioural sciences inquiry. The book is written for everyone who is interested in gaining an international (particularly East-West) knowledge of the subject, with a masterful understanding of the general issues involved. It contains detailed case studies as well as comparative material along with thought-provoking theoretical and methodological efforts to guide research. Policy and practice can also benefit from culture- and population-specific knowledge about the issues and strategies related to the provision of social support. For students in health and social-behavioural science fields, the book may serve as a comprehensive introduction and ongoing guide to research on social support and health. It should be useful for professors, researchers, and practitioners in social medicine, public health, nursing, gerontology, social work/welfare, psychology, social psychiatry/mental health, sociology, public policy, and administration-management sciences as a key reference in social support and health research. Other relevant fields include international studies, developmental studies, cultural study,

immigration study, womens study, family studies, community studies, urban studies, comparative social and health research, and research methods. Many in these fields share an interest in health promotion and maintenance via informal caregivers, professional services, and government aid. As more and more colleges and universities respond to rapid globalisation by developing course offerings in non-Western experiences or perspectives, this book offers optional readings that not only cover a major part of the non-Western world but also offer important understanding in comparative inquiry.
