*Regulation and the Global Financial Crisis* Daniel Cash, Robert Goddard, 2020-11-24 The Financial Crisis was a cross-sector crisis that fundamentally affected modern society. Regulation, as a concept, was both blamed for allowing the crisis to happen, but also tasked with developing and implementing solutions in the wake of the crash. In this book, a number of specialists from a range of fields have contributed their insights into the effect of the Financial Crisis upon the regulatory frameworks affecting their fields, how regulators have responded to the Crisis, and then what this may mean for the future of regulation within those industries. These analyses are joined by a picture of past financial crises - which reveals interesting patterns - and then analyses of architectural regulatory models that were fundamentally affected by the Crisis. The book aims to allow sector specialists the freedom to share their insights so that, potentially, a broader picture can be identified. Providing an interesting and thought-provoking account of this societally impactful era, this book will help the reader develop a more informed understanding of the potential future of financial regulation. The book will be of value to researchers, students, advanced level students, regulators, and policymakers.

*Personal Benchmark* Charles Widger, Daniel Crosby, 2014-10-10 In *Personal Benchmark: Integrating Behavioral Finance and Investment Management*, Chuck Widger and Dr. Daniel Crosby outline the ways in which a program of embedded behavioral finance, fueled by what matters most to you, can be your protection against irrational financial behavior. Along the way, you'll learn how to improve your investment experience, increase returns formerly sacrificed to misbehavior, and worry less about The Economy as you become increasingly focused on My Economy. Welcome to a new way of investing, a new paradigm for conceptualizing wealth, and a system of turning emotion from your portfolio's worst enemy into its best friend! In this new model, risk is simply the likelihood that we will underperform our dreams. Irrationality is acting in ways that thwart our ability to reach those dreams. And the optimal portfolio is not the one that generates the highest return in abstraction, it is the one that helps us meet our goals without killing our nerves before we get there. This book gives advisors the tools needed to effectively communicate the design and execution of the Personal Benchmark solution.

Climate Change Adaptations in Dryland Agriculture in Semi-Arid Areas Xavier Poshiwa,G. Ravindra Chary,2022-02-10

This book highlights the approaches for achieving trans-disciplinary research integration for “semi-arid dryland agriculture systems” under changing climates, while also identifying the elements of a collaborative research agenda that are needed to advance global food security. The book emphasizes climate change being a reality and how drylands are bearing the brunt in diverse ways. The major impact of dryland agriculture is on communities that need to: avoid the short- and long-term impacts of the changing climate; adapt strategies that can minimize these impacts; and be able to mitigate climate change, for which they need climate smart interventions. These interventions are only realized through knowledge and experience sharing among stakeholders from different sectors and backgrounds. It is in this context that the publication was seen as a necessity in order to bring together ideas that will transform lives and build adaptation capacities, thereby providing the much-needed products in communities leading to development

*Introduction to Cataloging and Classification* Daniel N. Joudrey,Arlene G. Taylor,David P. Miller,2015-09-29 A new edition of this best-selling textbook reintroduces the topic of library cataloging from a fresh, modern perspective. Not many books merit an eleventh edition, but this popular text does. Newly updated, *Introduction to Cataloging and Classification* provides an introduction to descriptive cataloging based on contemporary standards, explaining the basic tenets to readers without previous experience, as well as to those who merely want a better understanding of the process as it exists today. The text opens with the foundations of cataloging, then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records (FRBR), Functional Requirements for Authority Data (FRAD), the International Cataloging Principles (ICP), and RDA. Unlike other texts, the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats; ALA's Anglo-American Cataloging Rules, 2nd Edition, revised (AACR2R); or the International Standard Bibliographic Description (ISBD). Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification. In addition, the book introduces MARC, BIBFRAME, and other approaches used to communicate and display bibliographic data. Discussions of formatting, presentation, and administrative issues complete the book; questions useful for review and study appear at the end of each chapter.
