Australian Animal Law Elizabeth Ellis,2022-07-01 Australian Animal Law: Context and Critique provides comprehensive information about the legal and regulatory framework governing the interaction between humans and animals. By relating specific content areas to the discipline's broader characteristics and themes, researcher Elizabeth Ellis exposes the systemic nature of current problems and the consequent need for significant change. This book also illustrates the role of official animal protection narratives in legitimising the existing system despite the many factual flaws they contain. Ellis covers the major areas of animal law in detail, incorporating accessible contextual material and allowing readers to consolidate their understanding and build upon their knowledge. Key areas include the concept of unnecessary animal suffering, the effective exemption of most animals from the operation of cruelty laws, regulatory conflicts of interest, the hidden nature of animal use and the lack of transparency in animal law. Australian Animal Law is an essential resource, inviting reflection on the way the law helps to construct the relationship between human and non-human animals, including through its silences and omissions.

Gun Control Richard Skiba,2024-02-03 GUN CONTROL: INTERNATIONAL VIEWS, PERSPECTIVES AND COMPARISONS extensively explores gun control policies, firearm ownership landscapes, and associated issues across various countries. It begins with an introductory chapter outlining its scope and purpose. Subsequent chapters delve into topics such as gun control policies encompassing crime prevention, public safety, mass shooting reduction, mental health considerations, domestic violence prevention, accidental shooting prevention, national security, illegal firearm trafficking, and maintenance of public order. The book also addresses the definition of guns, civilian firearm use, responsible gun ownership, and the United States' intricate gun ownership landscape, covering laws, regulations, statistics, and the impact of policies on violent crime and mass shootings. Further chapters extend this analysis to other nations, exploring gun control scenarios in Canada, the United Kingdom, Australia, Germany, Switzerland, Japan, Brazil, South Africa, and Russia. Additionally, the book discusses global perspectives on gun ownership variations, the purchase process, and introduces a rating system for effective gun control policies. The final chapter explores the sociological aspects of sports shooting, covering historical development, cultural influences, community dynamics, inclusivity, economic factors, political aspects, controversies, and the intersection

of health and well-being. The inclusion of an index and reference section enhances the book's accessibility and credibility, ultimately presenting a comprehensive examination of diverse aspects within the realm of gun-related subjects.

Power, Politics and Influence Adebowale Akande, 2024-12-31 This book comprehensively explores the foundational principles of power, influence, and organizational politics, presenting actionable approaches for both employees and management to skillfully navigate these intricacies without succumbing to undue incivility, stress, or burnout. Power, as an imperceptible yet influential entity within organizations, steers the trajectory of decisions, behaviors, and the dynamic interplay between leaders and their teams. This book examines leadership theory and practice, offering a unique perspective on leadership styles, behaviors, and traits. In today's dynamic landscape, leadership capability and skill are important across sectors, influencing organizational health, political landscapes, and societal development. The book presents the challenges modern leaders face and how leadership theory can enrich workplace dynamics and beyond. Bridging the gap between academic research and practice, this volume offers guidance for aspiring and experienced leaders alike. From political skill to organizational culture, this book examines leadership from a multidisciplinary perspective. Scholars, students, and researchers of political science, business, management, economics, international relations, and psychology, as well as consultants, policymakers, and leaders interested in a better understanding of effective leadership concepts and the latest research in politics, policy, and participation in any setting, will find this resource invaluable.

Gun Control in Context Suzanna Fay, 2024-05-09 This book approaches the gun control debate by asking what it takes to achieve acceptance of, and compliance with, gun control regulations in a community thought to be opposed and resistant. It does this by centring this question on the experience of gun dealers who occupy a dual role in the compliance process - subject to its regulations, yet central to the application of all regulatory processes. The findings are surprising in that they demonstrate more support for gun control than opposition among this group, more willingness to cooperate with authorities than resistance, and more possibility for setting the tone for support with the wider gun owning community. This book considers how policy makers in the USA can capitalise on these overtones of collaboration and concern for public safety and learn from the successes and mistakes of the Australian gun control experience. *Gun Control in Context* is essential reading for all those engaged across the broad spectrum of the gun control debate and offers a grounded and reasoned approach to the challenges of public policy. It will be of interest to criminologists, legal scholars, and political scientists alike.

Reducing Gun Violence in America Daniel W. Webster, Jon S. Vernick, 2013-01-25 The staggering toll of gun violence—which claims 31,000 U.S. lives each year—is an urgent public health issue that demands an effective evidence-based policy response. The Johns Hopkins University convened more than 20 of the world's leading experts on gun violence and policy to summarize relevant research and recommend policies that are both constitutional and have broad public

support. Collected for the first time in one volume, this reliable, empirical research and legal analysis will help lawmakers, opinion leaders, and concerned citizens identify policy changes to address mass shootings, along with the less-publicized gun violence that takes an average of 80 lives every day. Selected recommendations include: • Background checks: Establish a universal background check system for all persons purchasing a firearm from any seller. • High-risk individuals: Expand the set of conditions that disqualify an individual from legally purchasing a firearm. • Mental health: Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual. • Trafficking and dealer licensing: Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales or other laws. • Personalized guns: Provide financial incentives to states to mandate childproof or personalized guns. • Assault weapons and high-capacity magazines: Ban the future sale of assault weapons and the future sale and possession of large-capacity ammunition magazines. • Research funds: Provide adequate federal funds to the Centers for Disease Control and Prevention, National Institutes of Health, and National Institute of Justice for research into the causes and solutions of gun violence. The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

Year Book, Australia ,2001

Examining Crime and Justice around the World Janet P. Stamatel,2020-11-04 A thorough and timely investigation of both well-established and emerging crime and punishment issues, this book provides readers with compelling examples of how different countries around the world confront these problems. This book offers a detailed look at 10 hot topics in crime and punishment that are shared by many countries. Some of these topics are well-established within the field of criminology, such as patterns of criminal behavior, juvenile delinquency, drug trafficking, policing, and punishment; others are emerging topics that have not been well studied across a variety of countries, such as violence against women, hate crimes, and gun control. Within each topic, the book explores how eight countries experience the issue, highlighting similarities across different places as well as unique treatments of the problem. The chapter on punishment addresses the widespread use of incarceration as criminal punishment but also considers different philosophies with respect to the purpose of incarceration and whether or not this strategy is effective in the face of large-scale criminal events, such as mass atrocities. The country narratives provide historical context for understanding the particular crime or punishment issue, current trends, and relevant statistical data for describing the extent of the issue and changes over time, in addition to contemporary examples of the issue.
