

Code From Information Theory To French Theory

David Perkins Page

Code Bernard Dionysius Geoghegan, 2023 In *Code* Bernard Dionysius Geoghegan reconstructs how Progressive Era technocracy as well as crises of industrial democracy and colonialism shaped early accounts of cybernetics and digital media by theorists including Norbert Wiener, Warren Weaver, Margaret Mead, Gregory Bateson, Claude Lévi-Strauss, Roman Jakobson, Jacques Lacan, Roland Barthes, and Luce Irigaray. His analysis casts light on how media-practical research forged common epistemic cause in programs that stretched from 1930s interwar computing at MIT and eugenics to the proliferation of seminars and laboratories in 1960s Paris. This mobilization ushered forth new fields of study such as structural anthropology, family therapy, and literary semiology while forming enduring intellectual affinities between the humanities and informatics. With *Code*, Geoghegan offers a new history of French theory and the digital humanities as transcontinental and political endeavors linking interwar colonial ethnography in Dutch Bali to French sciences in the throes of Cold War-era decolonization and modernization.--

Code Bernard Dionysius Geoghegan, 2022-12-09 In *Code* Bernard Dionysius Geoghegan reconstructs how Progressive Era technocracy as well as crises of industrial democracy and colonialism shaped early accounts of cybernetics and digital media by theorists including Norbert Wiener, Warren Weaver, Margaret Mead, Gregory Bateson, Claude Lévi-Strauss, Roman Jakobson, Jacques Lacan, Roland Barthes, and Luce Irigaray. His analysis casts light on how media-practical research forged common epistemic cause in programs that stretched from 1930s interwar computing at MIT and eugenics to the proliferation of seminars and laboratories in 1960s Paris. This mobilization ushered forth new fields of study such as structural anthropology, family therapy, and literary semiology while forming enduring intellectual affinities between the humanities and informatics. With *Code*, Geoghegan offers a new history of French theory and the digital humanities as transcontinental and political endeavors linking interwar colonial ethnography in Dutch Bali to French sciences in the throes of Cold War-era decolonization and modernization.

Programming Literature Rebecca Roach, 2025-12-18 This is a book about the messy, archival worlds of literature and computing, and the myriad of relations that have existed between the two. Before J. M. Coetzee was a writer of Nobel-Prize winning novels, the South African was a programmer for one of the most significant Cold War supercomputer projects in Britain. Experimental British writer Christine Brooke-Rose worked at Bletchley Park with Alan Turing. When not opining

about modernism, Canadian literary critic Hugh Kenner was a devoted computer hobbyist. Literary scholars have often not known what to make of these 'other careers': intimidating, irrelevant, outside of the scope of literary studies, surely? When they do make links, it is often via the frame of formal logic that has dominated discussions of both computer history and literary modernism. This book starts from a different assumption: that, far from irrelevant, these material experiences were significant in the development of the literary projects of writers including Coetzee, Brooke-Rose, Kenner, William Gaddis, and Kamau Brathwaite. It contends that it is in the practice and the archive, rather than on the plane of abstraction, that we can best see this influence. Addressing literary scholars, media and computer historians, and digital theorists alike, *Programming Literature* productively reframes contemporary debates around artificial intelligence, the value of the humanities, and tech culture by emphasizing just how material these worlds have always been.

Great Ideas in Information Theory, Language and Cybernetics Jagjit Singh, 1966 Although recent work on the theory of language, information, and automata leans heavily on some rather difficult mathematics, to understand its main ideas we need only know simple elaborations of four commonplace principles.
