Potencialidades Y Limitantes de Algunos Suelos en San Miguel La Palotada, Petén, Guatemala Jean Collinet, 1997

Elsevier's Dictionary of Geography Vladimir Kotlyakov, Anna Komarova, 2006-12-20 Geography is a system of highly developed sciences about the environment. Geographical science embracing the study of the Earth's physical phenomena, people and their economic activities has always been in need of an extensive terminology. Geographical terms are related to the terms of natural sciences (physics, chemistry, biology, geology, etc.) and humanities (history, economics, sociology, etc.) since geography is based on these fundamental subjects. Geography includes a number of disciplines and subdivisions which appeared along with the development of the science. In spite of being very different geographical disciplines have some common tools of investigation which are maps, comparative method of exploration, remote sensing, geoinformation systems. Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages. However, they are not always well-correlated. Nowadays geographical terminology requires unification and international correlation more than ever before. Hence the idea of compiling a multilingual polydisciplinary dictionary. The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered. Each entry consists of the term in English and its equivalents in Russian, French, German, Spanish. Short definitions of terms are given in English and in Russian. The terms are supplied with the necessary grammar labels, such as gender of nouns, plural number, etc. The Dictionary combines two functions: that of a defining dictionary and that of a bilingual dictionary. These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one, while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations, differing in the shades of meanings, thus giving him the possibility to choose the appropriate word. But in our Dictionary we intentionally decided to combine the two functions - defining and multilingual, because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages. Having this into consideration we deliberately mixed two types of dictionaries in one. - Organized alphabetically via English - Provides short definition of geographical terms in English and Russian - Includes multilingual

translation of terms from English to Russian, French, German, Spanish

Tratado de viticultura. Volumen I y II HIDALGO TOGORES, JOSE, 2019-10-04 Esta obra en su quinta edición se compone de dos volúmenes, que recogen el conocimiento técnico en todo lo referente a la historia y cultivo del viñedo a nivel mundial, aunque estando especialmente adaptada a la realidad española. Comienza con la historia de la vid y su cultivo en el mundo, describiendo a continuación de forma ordenada y estructurada, la fisiología y organografía de este cultivo, también el clima y suelo como medios de cultivo, siguiendo por la forma de multiplicarla y plantarla, gestionarla en lo referente a las operaciones de cultivo del suelo, poda, manejo de la vegetación, riego, fertilización, así como también sus plagas, enfermedades, accidentes meteorológicos y la forma de combatirlos. Se completa con otras formas de estudio, como las viticulturas de precisión, ecológica-biodinámica, tropical, uvas de mesa, pasas, etc., para terminar con un interesante apartado de análisis de costes vitícolas. Ambos autores han sido acreedores a seis premios de Viticultura y Enología otorgados por el máximo ente mundial en estas materias, la Organización Internacional de la Viña y el Vino (OIV), que confirma su solvencia docente y profesional, constituyendo un hecho sin parangón en el actual sector Vitivinícola a nivel mundial.

Tratado de Enología. Volumen I y II HIDALGO TOGORES, JOSE, 2018-12-11 La tipicidad y calidad de los vinos españoles en el mercado mundial se ha hecho patente en los últimos años, debido en parte al esfuerzo realizado por el sector, y a la tecnología aplicada en nuestros viñedos y sus producciones. En su tercera edición, esta obra recoge con fidelidad esta favorable situación, en un completo Tratado de Enología de gran envergadura, llenando un vacío, después de un paréntesis de varias décadas, dejado por el insigne Enólogo y maestro de maestros Juan Marcilla Arrazola. La estructura de esta obra se desarrolla de forma lógica y ordenada, desde la maduración de la uva, hasta el acondicionamiento de los mostos o vinos para su comercialización; destacando principalmente algunos aspectos como el necesario conocimiento de la Viticultura en la elaboración de los vinos, la armonización de la tecnología entre las escuelas europeas y la de los países emergentes, con una especial atención a la influencia de la maquinaria e instalaciones en la calidad de los vinos, y por fin al respeto que la Enología actual debe tener hacia el medio ambiente. Aunque este tratado recoge de forma independiente los conocimientos en Enología, forma parte de una obra más completa junto al Tratado de Viticultura de Luis Hidalgo Fernández-Cano, así como también del mismo autor, cerrando de esta forma el círculo de los conocimientos técnicos actuales sobre la vid y sus producciones. Su autor es José Hidalgo Togores, Doctor Ingeniero Agrónomo y Enólogo, en la actualidad uno de los mejores técnicos vitivinícolas españoles, con una gran experiencia como docente, proyectista de nuevas realizaciones y directivo en empresas del sector. Es autor de numerosos estudios y publicaciones: trabajos de investigación, libros técnicos, artículos y conferencias. Sus premios y distinciones nacionales e internacionales son numerosos, tanto a nivel universitario y docente,

como por sus trabajos de investigación, destacando la Medalla de Oro al Mérito Enológico. También ha sido premiado como Enólogo en numerosas ocasiones, tanto en España como en el extranjero, como coautor de la obra Ingeniería y Mecanización Vitícola publicada por Ediciones Mundi-Prensa, premiada por la Oficina Internacional de la Viña y del Vino (OIV) como mejor libro de Viticultura en el año 2002, así como también en su libro La Calidad del Vino desde el Viñedo, también premiado por la Organización de la Viña y del Vino (OIV) en el año 2007 como mejor libro de Viticultura. Este Tratado de Enología ha sido distinguido con el primer premio de la XXXII Edición del Libro Agrario de la Feria de San Miguel, dentro del 49º Salón Nacional de Maquinaria Agrícola de Lleida, así como con el premio de la Oficina Internacional de la Viña y del Vino (OIV) como mejor libro de Enología en el año 2004. Estos tres premios al mejor libro del año otorgados por la OIV a un mismo autor, confirman su solvencia docente y profesional, así como constituyen un hecho sin parangón en el actual sector Vitivinícola a nivel mundial.
