**The History of Archery** Theodore R. Whitman,2017-08-03 Learn all about the history, development and current state of History of Archery in this collection of articles by author/expert Theodore R. Whitman. From it's beginnings in the Epipaleolithic period, progress through ancient history and the middle ages; and continuing through to the present day, this interesting book covers archery through many periods of human history. The bow & arrow are known to have been invented by the end of the Upper Paleolithic, and for at least 10,000 years archery was an important military & hunting skill, and is featured prominently in the mythologies of many cultures. Archers, whether on foot, in chariots and on horseback were a major part of most militaries until about 1500 when they began to be replaced by firearms, first in Europe, and then progressively elsewhere.

*Straight and True* Hugh D. H. Soar,2012 The arrow, essentially a specialized spear, is among the most ancient human inventions and can be found in cultures throughout the world. In *Straight and True: A Select History of the Arrow*, Hugh D. H. Soar describes the transition from hand-thrown spear to bow-launched arrow and then follows the arrow's developments in cultures around the world and across time. Relying on his considerable knowledge accumulated through decades of research, the author provides the reader with an appreciation for a humble device that, coupled with the bow, changed the history of the world.
