

How Many Seeds In A Pumpkin

Margaret McNamara

How Many Seeds in a Pumpkin? Margaret McNamara, 2016 Charlie, the smallest child in his first grade class, is amazed to discover that of the three pumpkins his teacher brings to school, the tiniest one has the most seeds.

How Many Seeds in a Pumpkin? (Mr. Tiffin's Classroom Series) Margaret McNamara, 2007-07-10 Mr. Tiffin and his students explore skip counting and estimation in a fun pumpkin-themed classroom experiment! This book makes a wonderful read-aloud companion to any math or science curriculum, and it's a fun way to reinforce counting skills at home. How many seeds are in a pumpkin? Mr. Tiffin asks his class as they gather around the big, medium, and small pumpkins on his desk. Robert, the biggest kid, guesses that the largest one has a million seeds; Elinor, sounding like she knows what she's talking about, guesses the medium one has 500 seeds; and Anna, who likes even numbers better than odd ones, guesses that the little one has 22. Charlie, the smallest boy in the class, doesn't have a guess. Counting pumpkin seeds is messy business, but once the slimy job is done, to everyone's surprise, the smallest pumpkin has the most seeds! As Charlie happily exclaims, Small things have a lot going on inside of them. And don't miss the newest addition to the Mr. Tiffin series, The Dinosaur Expert!

Handbook of Nature Study Anna Botsford Comstock, 1939 Provides lessons on many topics of nature study, with questions that may form the basis for student projects.

Teaching Science Through Trade Books Christine Anne Royce, Karen Rohrich Ansberry, Emily Rachel Morgan, 2012 If you like the popular Teaching Science Through Trade Books columns in NSTA's journal Science and Children, or if you've become enamored of the award-winning Picture-Perfect Science Lessons series, you'll love this new collection. It's based on the same time-saving concept: By using children's books to pique students' interest, you can combine science teaching with reading instruction in an engaging and effective way.

Using Children's Literature to Teach Problem Solving in Math Jeanne White, 2013-11-12 Learn how to use children's literature to engage students in mathematical problem solving. Teaching with children's literature helps build a positive math environment, encourages students to think abstractly, shows students the real-world purposes of math, builds content-area literacy, and appeals to students with different learning styles and preferences. This practical book provides specific children's book ideas and standards-based lessons that you can use to bring math alive in your own classroom.

Special Features: Step-by-step ideas for using children's literature to teach lessons based on the Common Core Standards for Mathematical Content in kindergarten, first, and second grade Scripting, modeling, and discussion prompts for each lesson Information on alignment to the Standards for Mathematical Practice and how to put them into student-friendly language Reference to a wide variety of specific children's literature that can provide a context for young children learning to engage in the standards Differentiated activities for students who are early, developing, and advanced problem solvers

Even More Everyday Science Mysteries Richard Konicek-Moran,2010 What are the odds of a meteor hitting your house? What are warm clothes anyway? Do you get more sunlight from Daylight Saving Time? Everyone loves a good mystery and these unfold in the 15 stories presented in *Even More Everyday Science Mysteries*, the third volume in author Richard Konicek-Moran's award-winning series. Again, the author uses stories without endings to teach a science principle, allowing the students to investigate how each story can be resolved. All the stories relate to the world around us and encourage students to take ownership of their learning. In *Here's the Crusher*, family members ponder what could have crushed a plastic soda bottle sitting on a table. By exploring each family member's idea, common misconceptions are uncovered and discussed. In *Florida Cars?* Amber seeks out the causes of rust on cars from Florida. She experiments with nails to try to discover what ingredients produce rust. Your students will tackle Amber's problem and reach their own conclusions. Science topics explored include evaporation, erosion, thermal energy, atmospheric pressure, buoyancy, and density. These stories are bound to reveal the wonderful ideas all students have, give them the confidence to explore their own thinking, and provide opportunities for them to 'do' science rather than have science 'done' to them. --Page Keeley, NSTA President 2008-09
