An Introduction to Learning and Teaching in Higher Education Peter Scales, 2017-10-16 This book is a comprehensive yet accessible introduction to learning and teaching in higher education, and an invaluable resource if you are seeking to enhance and develop your teaching in the context of the Teaching Excellence Framework (TEF). It also supports your progress towards Fellowship of the Higher Education Academy (HEA), with an overview of the UK Professional Standards Framework (UKPSF) and linking content to the framework. This book is for new and existing teachers in higher education and those teaching higher education programmes in further education colleges. As well as helping you enhance and extend your understanding of the theory and practice of learning and teaching, this book encourages you to reflect on and improve your teaching in higher education to meet the needs of a diversity of students in the changing landscape of higher education. Together with its progressive and logical sequencing of topics - covering planning and preparation; techniques, methods and resources; assessment, quality and evaluation - the book provides:

- A core text and resource for new teachers in higher education undertaking postgraduate programmes in learning and teaching.
- An accessible and practical introduction to the knowledge and skills required to become a confident and effective lecturer in higher education
- Mapping to the HEA UK Professional Standards Framework to provide guidance and support for those working towards Fellowship of the HEA together with sample Fellowship applications
- 'Pause & Reflect' boxes to reinforce your professional learning journey

This book is not only an excellent introduction to learning and teaching in university but also for those providing higher level learning in further education colleges. Vicky Duckworth, Reader in Education, Edge Hill University, UK This wide-ranging almost encyclopedic book touches on all the topics and issues that someone new to higher education is required to address. Scales provides a guide for the new higher education teacher through the confusing and confused world of higher education in order that they can remain a teacher despite institutional distractions. Dennis Hayes, Professor of Education, University of Derby, UK This book provides a welcome and timely addition which will be of huge value to anybody with an interest in teaching and learning in higher education. It will be of particular value to those new to teaching in the higher education sector as well as more experienced staff who wish to update their skills or apply for Higher Education

Academy recognition. Chris Wakeman, Head of Education and Inclusion Studies, University of Wolverhampton, UK Peter Scales shares my dislike for the word 'delivery' to describe teaching and clearly explains why! The text is passionate, readable and engaging with a logical presentation of the lived experiences of teaching in higher education." Beverley Hale, Professor of Learning and Teaching, University of Chichester, UK

Critical Reflection in Practice Gary Rolfe, Dawn Freshwater, Melanie Jasper, 2025-10-02 Critical reflection and reflective practice are at the heart of modern healthcare. But what do these terms really mean? This textbook analyses and explores the significance of reflection in professional health and social care practice. Taking an interdisciplinary approach, this book presents a structured method that empowers you to both challenge and develop your own practice. New to this edition: - Updated to reflect global developments in contemporary understandings of reflective practice - A brand-new chapter on reflective and reflexive practice - Engaging chapter exercises and 'key takeaway' features to reinforce and support learning Containing real-life case studies and reflective activities, this book is an essential guide to critical reflection for all students, academics and practitioners alike, enhancing both personal and professional development.

Critical Perspectives on Work-Integrated Learning in Higher Education Institutions Nirmala Dorasamy, Renitha Rampersad, 2018-11-30 Governments around the world are committed to enhancing students' "graduateness". Work-integrated learning (WIL) is one of the many programmes which Higher Education Institutions (HEIs) can develop to promote this facet of student life. The incorporation of work-integrated learning in curriculum design and development can produce reciprocal benefits for students, workplaces, professions and communities. Any curriculum design and development endeavour relating to WIL requires appropriate resources to support curriculum development. This book serves to explore WIL programmes and experiences for the student, WIL coordinator and supervisor. It further integrates practical, relevant and reflective industry experience within the higher education curriculum to enhance student development. WIL has no uniform or specific framework or approaches since it is an emerging field and is generally influenced by contextual factors. In view of the diversity in theory and practice and different purposes, whether pragmatic or practical, driving the adoption of one approach over another, this book highlights the diverse approaches that encapsulate WIL in South Africa.

Learning and Performance Assessment: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-10-11 As teaching strategies continue to change and evolve, and technology use in classrooms continues to increase, it is imperative that their impact on student learning is monitored and assessed. New practices are being developed to enhance students' participation, especially in their own assessment, be it through peer-review, reflective assessment, the introduction of new technologies, or other novel solutions. Educators must remain up-to-date on the latest methods of evaluation and performance measurement techniques to ensure that their students excel. Learning and Performance Assessment: Concepts, Methodologies, Tools, and Applications is a vital reference source that

examines emerging perspectives on the theoretical and practical aspects of learning and performance-based assessment techniques and applications within educational settings. Highlighting a range of topics such as learning outcomes, assessment design, and peer assessment, this multi-volume book is ideally designed for educators, administrative officials, principals, deans, instructional designers, school boards, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes.
