Textiles, Identity and Innovation: In Touch Gianni Montagna,Manuela Cristina Paulo Carvalho Figueiredo,2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms, in order to better understand, study, adapt and project them for the future. It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way, adapting them to their objectives and research. D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations. Present in all areas of knowledge, the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge. D_Tex proposes to promote discussion and knowledge in the different areas where textiles, with all their characteristics, can ensure an important contribution, combining material and immaterial knowledge, innovative and traditional techniques, technological and innovative materials and methods, but also new organization and service models, different concepts and views on teaching. With the renewed idea of the intrinsic

interdisciplinarity of design and sharing with different areas that support each other, the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019, held June 19-21, 2019 at the Lisbon School of Architecture of the University of Lisbon, Portugal under the theme In Touch where, as broadly understood as possible, different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers.

The Routledge International Handbook of Ethnographic Film and Video Phillip Vannini, 2020-04-02 The Routledge International Handbook of Ethnographic Film and Video is a state-of-the-art book which encompasses the breadth and depth of the field of ethnographic film and video-based research. With more and more researchers turning to film and video as a key element of their projects, and as research video production becomes more practical due to technological advances as well as the growing acceptance of video in everyday life, this critical book supports young researchers looking to develop the skills necessary to produce meaningful ethnographic films and videos, and serves as a comprehensive resource for social scientists looking to better understand and appreciate the unique ways in which film and video can serve as ways of knowing and as tools of knowledge mobilization. Comprised of 31 chapters authored by some of the world's leading experts in their

respective fields, the book's contributors synthesize existing literature, introduce the historical and conceptual dimensions of the field, illustrate innovative methodologies and techniques, survey traditional and new technologies, reflect on ethics and moral imperatives, outline ways to work with people, objects, and tools, and shape the future agenda of the field. With a particular focus on making ethnographic film and video, as opposed to analyzing or critiquing it, from a variety of methodological approaches and styles, the Handbook provides both a comprehensive introduction and up-to-date survey of the field for a vast variety of audiovisual researchers, such as scholars and students in sociology, anthropology, geography, communication and media studies, education, cultural studies, film studies, visual arts, and related social science and humanities. As such, it will appeal to a multidisciplinary and international audience, and features a dynamic, forward-thinking, innovative, and contemporary focus oriented toward the very latest developments in the field, as well as future possibilities.

Virtual Reality and Virtual Environments Andrzej Grabowski, 2020-07-29 Virtual reality (VR) techniques are becoming increasingly popular. The use of computer modeling and visualization is no longer uncommon in the area of ergonomics and occupational health and safety. This book explains how studies conducted in a simulated virtual world are making it possible to test new solutions for designed workstations, offering a high degree of ease for introducing modifications and eliminating risk and work-related accidents. Virtual reality techniques offer a wide range of possibilities including increasing the cognitive abilities of the elderly, adapting workstations for people with disabilities and special needs, and remote control of machines using collaborative robots. Detailed discussions include: Testing protective devices, safety systems, and the numerical reconstruction of work accidents Using computer simulation in generic virtual environments On the one hand, it is a self-study book made so by well-crafted and numerous examples. On the other hand, through a detailed analysis of the virtual reality from a point of view of work safety and ergonomics and health improvement. Ewa Grabska, Jagiellonian University, Kraków, Poland Noteworthy is the broad scope and diversity of the addressed problems, ranging from training employees using VR environments with different degrees of perceived reality; training and rehabilitation of the elderly; to designing, testing, modifying, and adapting workplaces to various needs including those of disabled workers; to simulation and investigation of the cause of accidents at a workplace. Andrzej Krawiecki, Warsaw University of Technology, Warsaw, Poland

Locomotion humaine Arnaud Delafontaine, 2018-06-12 La marche constitue un processus extrêmement complexe qui implique des fonctions motrices, sensibles et intégratrices : c'est un défi que l'homme relève quotidiennement. Son étude constitue donc un enjeu majeur de la kinésithérapie/physiothérapie et de la rééducation médico-chirurgicale. Qu'elle soit normale ou pathologique, sa compréhension fait appel à des mécanismes que tout kinésithérapeute, ou thérapeute, doit impérativement maîtriser. Cet ouvrage, véritable référence sur le sujet, aborde la marche, normale et pathologique, de

l'enfant au sujet âgé. Il traite de l'ensemble du contrôle moteur en lien avec la locomotion, intégrant : - le contrôle de l'équilibre - la marche humaine et les pathologies locomotrices - l'évaluation clinique et les nouvelles applications thérapeutiques - la course. De nombreux points clés à retenir, des résumés, des encadrés et un quizz d'entraînement à la fin de chaque chapitre permettent de renforcer les apprentissages. L'orientation évidence based practice est toujours donnée. Cet ouvrage très complet s'adresse aux étudiants en IFMK, aux ostéopathes en formation mais aussi à tous ces praticiens diplômés en exercice. Les professionnels impliqués dans la rééducation et la pratique sportive (STAPS, ergothérapeutes, podologues, thérapeutes manuels, médecins de rééducation, médecins du sport et de traumatologie, préparateurs physiques, responsables pédagogiques, enseignants...) y trouveront les réponses à des problématiques souvent transversales.

The Philippine Seas: Biodiversity and Ecological Impacts of Natural and Anthropogenic stressors in Tropical Reef Systems Michael Yu Roleda,Yehuda Benayahu,2024-04-18 The Philippines is located in a region called the Coral Triangle; an area of exceptional importance as it is recognized as the global center for marine biodiversity. Within this region, the Philippines is also known as the center of this center. The marine resources are made up of coral reefs, seagrass beds, seaweeds, invertebrates, fisheries, and many others. Unfortunately, the Philippines is facing challenges to conserve its marine biodiversity due to overfishing, destructive fishing practices, and mariculture-derived eutrophication and coastal acidification, among others. These human activities coupled with climate change pose serious threats and possible decimation of its marine biodiversity.
