Ernest Nagel: Philosophy of Science and the Fight for Clarity Matthias Neuber,Adam Tamas Tuboly,2021-09-21 This volume is dedicated to the life and work of Ernest Nagel (1901-1985) counted among the influential twentieth-century philosophers of science. Forgotten by the history of philosophy of science community in recent years, this volume introduces Nagel's philosophy to a new generation of readers and highlights the merits and originality of his works. Best known in the history of philosophy as a major American representative of logical empiricism with some pragmatist and naturalist leanings, Nagel's interests and activities went beyond these limits. His career was marked with a strong and determined intention of harmonizing the European scientific worldview of logical empiricism and American naturalism/pragmatism. His most famous and systematic treatise on, *The Structure of Science*, appeared just one year before Thomas Kuhn's even more renowned, *The Structure of Scientific Revolutions*. As a reflection of Nagel's interdisciplinary work, the contributing authors' articles

are connected both historically and systematically. The volume will appeal to students mainly at the graduate level and academic scholars. Since the volume treats historical, philosophical, physical, social and general scientific questions, it will be of interest to historians and philosophers of science, epistemologists, social scientists, and anyone interested in the history of analytic philosophy and twentieth-century intellectual history.

Bias-aware Teaching, Learning and Assessment Donna Hurford, Andrew Read, 2025-02-28 This book offers university teachers informed and practical strategies for raising awareness of bias in teaching, learning and assessment practices. Conscious and unconscious biases influence judgements, perceptions, decision making and actions, and societal awareness has now turned the spotlight on how higher education (HE) is addressing bias at institutional and individual levels. The urgency to do so is evidenced through recent studies which reveal the extent of the effects of discrimination and exclusion experienced by individual students, groups of students and members of staff. It can be difficult to know where to start and how to sustain effective impact to achieve inclusion, equity and equality of opportunity. This book offers informed and practical strategies for raising awareness of bias in teaching, learning and assessment practices and provides approaches to eliminate, limit and mitigate the negative effects of bias on university students.
