Emerson Hough

**The New Case for Gold** James Rickards, 2016-04-05 \*\*USA Today bestseller and Wall Street Journal business bestseller\*\* They say John Maynard Keynes called gold a barbarous relic. They say there isn't enough gold to support finance and commerce. They say the gold supply can't increase fast enough to support world growth. They're wrong. In this bold manifesto, bestselling author and economic commentator James Rickards steps forward to defend gold—as both an irreplaceable store of wealth and a standard for currency. Global political instability and market volatility are on the rise. Gold, always a prudent asset to own, has become the single most important wealth preservation tool for banks and individuals alike. Rickards draws on historical case studies, monetary theory, and personal experience as an investor to argue that: • The next financial collapse will be exponentially bigger than the panic of 2008. • The time will come, sooner rather than later, when there will be panic buying and only central banks, hedge funds, and other big players will be able to buy any gold at all. • It's not too late to prepare ourselves as a nation: there's always enough gold for a gold standard if we specify a stable, nondeflationary price. Providing clear instructions on how much gold to buy and where to store it, the short, provocative argument in this book will change the way you look at this “barbarous relic” forever.

*Summary of James Rickards's The New Case for Gold* Everest Media, 2022-05-22T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The Fed is not insolvent, but it is highly leveraged, and its balance sheet is not marked to market. This makes it vulnerable to large swings in market value. #2 The Fed's balance sheet lumps U. S. Treasury securities—Notes and Bonds, nominal into a single category and shows holdings of approximately \$2.3 trillion as of this writing. The Fed then breaks those holdings down by regional reserve bank. #3 The Federal Reserve is so dominated by MIT-trained quants and PhDs that the policy makers get lost in the models and lose sight of the temperament of the American people. In early 2015, I had a private dinner with an official from the Federal Reserve who was categorical: We're not insolvent, and never have been. #4 The Gold Reserve Act of 1934 required the United States to issue gold certificates to the Federal Reserve, which it did. The certificates were last marked to market in 1971, at a price of \$42.22 per ounce. Using that price and the information on the Fed's balance sheet, this translates into approximately 261.4

million ounces of gold, or about eight thousand tons.
