**America's Most Wanted Recipes Kids' Menu** Ron Douglas,2015-06-02 The author of the New York Times bestselling America's Most Wanted Recipes series reveals the secrets to winning over your kids' tummies with their favorite restaurant meals made in the comfort of your own kitchen! More than a million home chefs have devoured Ron Douglas's ingenious copycat recipes. From desserts to low-calorie and grilled meals, he's proven how simple and cost-effective it is to prepare mouthwatering restaurant dishes at home. In America's Most Wanted Recipes Kids' Menu, he shares the ingredients to more than 100 of the most frequently ordered dishes from the country's most popular children's menus: Buca di Beppo's Cheese Manicotti, PF Chang's Crispy Honey Chicken, Applebee's Kids' Mini Hamburger, Chili's Cinnamon Apples, Così's Mississippi Mud Pie, Friendly's Chicken Quesadillas, Panera Bread's Mac and Cheese, Uno Chicago Grill's Safari Nuggets, and much, much more. Face it, we all know the best way to make sure our kids are eating right is to prepare their food at home. Restaurant meals are traditionally high in calories, sodium, and fat. The dishes featured in Kids' Menu were selected and designed to be served as occasional treats and as a fun way to get the family together in the kitchen, comparing the copycat version against the original. By making these dishes at home, parents will have the opportunity to make them healthier by substituting different ingredients and cooking methods. That's what Kids' Menu provides. Also included is a section on children's nutrition and advice on how to balance the foods they love with ingredients that are good for them. Be the ultimate

“sneaky chef.” Prepare the meals your family loves, knowing you’re giving them the nutrition they need. America’s Most Wanted Recipes Kids’ Menu will help you save money (no more drive-thru!) and calories, while you indulge in good food and quality time with the people you love around the dinner table.

*Digital Fabrication with Cement-Based Materials* Nicolas Roussel,Dirk Lowke,2022-01-12 This book presents the work of the RILEM Technical Committee 276-DFC: Digital fabrication with cement-based materials. The most important outcomes of the technical committee are presented. First, a unified process classification for digital fabrication with concrete is proposed, discussed and illustrated. Then, a state of the art of the testing methods (both at a material and structural level and in the fresh and hardened state) is provided. The gathered knowledge is expected to form the foundation of some quality control procedures for fresh properties along with hardened properties and service life performance. The book will benefit academics, practitioners, industry and standardization committees interested in digital fabrication with cement-based materials.

**Development Models in Muslim Contexts** Robert Springborg,2009 This series seeks to address salient and urgent issues faced by Muslim societies as they evolve in a rapidly globalising world. It brings together the scholarship of leading specialists from various academic fields, representing a wide range of theoretical and practical perspectives. --

Axonopathy in Neurodegenerative Disease Samuel D. Crish,Robert W. Burgess,Denise M. Inman,Christine M. Dengler-Crish,Jason R. Richardson,Brett Schofield,2019-02-05 Axons are the major output processes of neurons, responsible for transmitting information to other neurons and tissues throughout the body. The 150,000+ kilometers of axons make up half of the brain's volume and require a large amount of energy. Normal axon function is the product of a massive number of intra- and extra-cellular mechanisms working in concert. Perhaps not surprisingly, the axon is a site of vulnerability during normal aging and in disease states, although this has only been recently appreciated. Axonopathy, broadly defined as functional or structural defects in the axon or its terminal, is common across a wide range of neurodegenerative conditions, including amyotrophic lateral sclerosis, Huntington’s, Parkinson’s, and Alzheimer’s diseases, glaucoma, and as a result of neurotoxin exposure or drug treatment. This Research Topic assembles a series of original research papers, reviews, and commentaries that will illustrate both the commonalities and important differences across neurodegenerative disorders. Though this collection cannot address all aspects of this topic, it is our hope that these manuscripts will educate other

scientists and inspire new investigations into axon dysfunction and degeneration.

**Handbook of the Economics of Giving, Altruism and Reciprocity** Serge-Christophe Kolm, Jean Mercier Ythier, 2006-07-19 The Handbook on the Economics of Giving, Reciprocity and Altruism provides a comprehensive set of reviews of literature on the economics of nonmarket voluntary transfers. The foundations of the field are reviewed first, with a sequence of chapters that present the hard core of the theoretical and empirical analyses of giving, reciprocity and altruism in economics, examining their relations with the viewpoints of moral philosophy, psychology, sociobiology, sociology and economic anthropology. Secondly, a comprehensive set of applications are considered of all the aspects of society where nonmarket voluntary transfers are significant: family and intergenerational transfers; charity and charitable institutions; the nonprofit economy; interpersonal relations in the workplace; the Welfare State; and international aid.\*Every volume contains contributions from leading researchers\*Each Handbook presents an accurate, self-contained survey of a particular topic \*The series provides comprehensive and accessible surveys
