God in Context Karel van der Toorn,2018-11-13 In this work, Karel van der Toorn explores the social setting, the intellectual milieu, and the historical context of the beliefs and practices reflected in the Hebrew Bible. While fully recognizing the unique character of early Israelite religion, the author challenges the notion of its incomparability. Beliefs are anchored in culture. Rituals have societal significance. God has a history. By shifting the focus to the context, the essays gathered here yield a deeper understanding of Israelite religion and the origins of the Bible.

Coins, Bodies, Games, and Gold Leslie Kurke, 2021-01-12 The invention of coinage in ancient Greece provided an arena in which rival political groups struggled to imprint their views on the world. Here Leslie Kurke analyzes the ideological functions of Greek coinage as one of a number of symbolic practices that arise for the first time in the archaic period. By linking the imagery of metals and coinage to stories about oracles, prostitutes, Eastern tyrants, counterfeiting, retail trade, and games, she traces the rising egalitarian ideology of the polis, as well as the ongoing resistance of an elitist tradition to that development. The argument thus aims to contribute to a Greek history of ideologies, to chart the ways ideological contestation works through concrete discourses and practices long before the emergence of explicit political theory. To an elitist sensibility, the use of almost pure silver stamped with the state's emblem was a suspicious alternative to the para-political order of gift exchange. It ultimately represented the undesirable encroachment of the public sphere of the egalitarian polis. Kurke re-creates a language of metals by analyzing the stories and practices associated with coinage in texts ranging from Herodotus and archaic poetry to Aristotle and Attic inscriptions. She shows that a wide variety of imagery and terms fall into two opposing symbolic domains: the city, representing egalitarian order, and the elite symposium, a kind of anti-city. Exploring the tensions between these domains, Kurke excavates a neglected portion of the Greek cultural imaginary in all its specificity and strangeness.

The Oxford Handbook of Light in Archaeology Costas Papadopoulos, Holley Moyes, 2021-12-09 Light has a fundamental role to play in our perception of the world. Natural or artificial lightscapes orchestrate uses and experiences of space and, in turn, influence how people construct and negotiate their identities, form social relationships, and attribute meaning to (im)material practices. Archaeological practice seeks to analyse the material culture of past societies by examining the interaction between people, things, and spaces. As light is a crucial factor that mediates these relationships, understanding its principles and addressing illumination's impact on sensory experience and perception should be a fundamental pursuit in archaeology. However, in archaeological reasoning, studies of lightscapes have remained largely neglected and understudied. This volume provides a comprehensive and accessible consideration of light in archaeology and beyond by including dedicated and fully illustrated chapters covering diverse aspects of illumination in different spatial and temporal contexts, from prehistory to the present. Written by leading international scholars, it interrogates the qualities and affordances of light in different contexts and (im)material environments, explores its manipulation, and problematises its elusive properties. The result is a synthesis of invaluable insights into sensory experience and perception, demonstrating illumination's vital impact on social, cultural, and artistic contexts.
