Writings Near the End of the Human Era: Stories and Book Reviews Peter McMillan, 2023-10-01 There are two collections in this book: one of 15 short stories and one of 11 book reviews. Fiction and nonfiction don't usually get combined this way, but, in my writing at least, I think the two complement one another. A second reason for the fiction/nonfiction merger is that joining the two gives the book a certain heft though not so much so that the reader hesitates at the upfront commitment of slogging through hundreds of pages. And a third reason is that the one part may be of interest but not the other. Political economy, for instance, is not everyone's bag. I get that. The stories are recent, dating from the publication of *Flash! Fiction: Around the Block* in 2022. The book reviews are from some of the books I can recommend to readers interested.

The COVID Pandemic: Essays, Book Reviews, and Poems Therese Jones, Kathleen Pachucki, 2022-10-31 This book contains several critical essays, book reviews, and poems that address the current pandemic to mark a sad but hopeful first anniversary of COVID. Similar to many academic journals, the *Journal of Medical Humanities*, in which these contributions were first published, has received a number of submissions during the first year of the pandemic relating directly to it. In the early months, the journal saw an unprecedented number of poetry submissions from physicians who seemed to be turning to verse as a way to memorialize what was happening, to find ways of healing from the devastating number of dying patients, and to capture the exhaustion and anxiety of caring for others day after day without respite. By publishing this selection, the volume editors honor and thank all those who have been caring for patients, teaching and mentoring students, and as such have been contributing to our understanding and awareness of this crisis. Previously published in *Journal of Medical Humanities*, Volume 42, issue 1, March 2021. Chapters "COVID-19, Contagion, and Vaccine Optimism", "Virile Infertile Men, and Other Representations of In/Fertile Hegemonic Masculinity in Fiction Television Series", "Movement as Method: Some Existential and Epistemological Reflections on Dance in the Health Humanities" and "The Ethic of Responsibility: Max Weber's *Verstehen* and Shared Decision-Making in Patient-Centred Care" are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The Good-Enough Life Avram Alpert, 2023-09-19 How an acceptance of our limitations can lead to a more fulfilling life and a more harmonious society. We live in a world oriented toward greatness, one in which we feel compelled to be among the wealthiest, most powerful, and most famous. This book explains why no one truly benefits from this competitive social

order, and reveals how another way of life is possible—a good-enough life for all. Avram Alpert shows how our obsession with greatness results in stress and anxiety, damage to our relationships, widespread political and economic inequality, and destruction of the natural world. He describes how to move beyond greatness to create a society in which everyone flourishes. By competing less with each other, each of us can find renewed meaning and purpose, have our material and emotional needs met, and begin to lead more leisurely lives. Alpert makes no false utopian promises, however. Life can never be more than good enough because there will always be accidents and tragedies beyond our control, which is why we must stop dividing the world into winners and losers and ensure that there is a fair share of decency and sufficiency to go around. Visionary and provocative, *The Good-Enough Life* demonstrates how we can work together to cultivate a good-enough life for all instead of tearing ourselves apart in a race to the top of the social pyramid.

Artifacts of a Troubled and Troublesome Species Peter McMillan, 2025-07-01 The theme of the writings presented in this collection is history, sometimes fictions but mostly opinions based on the interpretation of facts—real events, real people, real places and ‘real’ ideas. Included in this volume are 30 short pieces—six flash fictions and 24 nonfictions. (The last three are new in this newly expanded edition.) The nonfictional writing consists of book reviews along with a few letters to North American political leaders, which, realistically speaking, may have only ever been read by a junior staffer. The subject matter of the nonfiction is largely political and the topics broadly fall under the category of governance and freedom within the state and sovereignty in international relations. There is a fair bit of history and political theory in the books as well as in the reviews. Their accounts and explanations are shaped by facts and opinions, and, of course, values. The same applies to the reviews. Writers from every age have thought of theirs as something special in the history of humanity. We’re no less presumptuous. To hear us go on about it, one would think that most human history of any consequence has been recorded from the modern era. What we judge important now may be reassessed hundreds of years from now. We’ll never know how. What we do have are artifacts that give some sense of what some people were thinking and doing during our time. To the future ‘us’, it may be laughable, grotesque or—pity the age—viewed with envy. Below the level of political labels, there lies something much more fundamental to our species. In *Rebellion*, Robert Kagan expresses this pithily: “Once they [immigrants] attain these goals, however, their fervor for liberalism has often faded. “I’ve got mine” is among the most basic of human sentiments.” Not for a minute do I believe Kagan’s remarks to be limited to newly immigrated folks. He’s talking about us, our kind, our species. And as you read these authors’ works for yourself, you will find that there are many other ‘sentiments’ that we have in common irrespective of race, religion, language and a host of other identity markers. ____ This collection does not presume to be a definitive, comprehensive or even necessarily representative body of artifacts. It is an eclectic accumulation of interpretations of how certain people live and think in this part of the world—North America—at this time as collected by a curator of no particular renown. And with the exception of a short story by Italo Calvino and a sociopolitical

treatise by Hannah Arendt, that time is the early 21st century. A list of the titles and authors of the texts reviewed follows on the next page. It is hoped that this will be helpful to the reader in choosing what, if anything, to read beyond this Introduction. The author's short fictions in Part One constitute his contribution.

Barack Obama Burton I. Kaufman, 2022-03-15 In this insightful biography, Burton I. Kaufman explores how the political career of Barack Obama was marked by conservative tendencies that frustrated his progressive supporters and gave the lie to socialist fearmongering on the right. Obama's was a landmark presidency that paradoxically, Kaufman shows, resulted in few, if any, radical shifts in policy. Following his election, President Obama's supporters and detractors anticipated radical reform. As the first African American to serve as president, he reached the White House on a campaign promise of change. But Kaufman finds in Obama clear patterns of classical conservatism of an ideological sort and basic policy-making pragmatism. His commitment to usher in a multiracial, multiethnic, and multicultural society was fundamentally connected to opening up, but not radically altering, the existing free enterprise system. The Affordable Care Act, arguably President Obama's greatest policy achievement, was a distillation of his complex motivations for policy. More conservative than radical, the ACA fitted the expansion of health insurance into the existing system. Similarly, in foreign policy, Obama eschewed the use of force to affect regime change. Yet he kept boots on the ground in the Middle East and supported ballot-box revolts geared toward achieving in foreign countries the same principles of liberalism, free enterprise, and competition that existed in the United States. In estimating the course and impact of Obama's full political life, Kaufman makes clear that both the desire for and fear of change in the American polity affected the popular perception but not the course of action of the forty-fourth US president.

Society for Old Testament Study Book List 2001 George J. Brooke, 2001-06-01 The Book List provides short reviews of up to 500 books a year. It includes publications not only on the Old Testament directly but also on many related areas, including archaeology, epigraphy, Hebrew and related Semitic languages (especially Northwest Semitic), relevant ancient Near Eastern history and literature, the Hellenistic world, early Judaism, and social anthropology. The main value of the Book List is its comprehensiveness and its immediacy, in that it is usually among the first periodicals to review a book. This publication also appears as issue 5 of the Journal for the Study of the Old Testament.
