Strategic Culture in Russia's Neighborhood Katalin Miklóssy, Hanna Smith, 2019-07-24 This book explains the complex relations and entanglements of Russia and its neighboring countries, an area that changed dramatically after the collapse of communism and the end of the Cold War. The chapters discuss how the strategic cultures of different countries display common characteristics rooted in this special geopolitical space that has been subjected to simultaneous changes over a longer time. Shared historical experiences provide a common ground to interpret outside threats. The spatial context is relevant in this volume because the focus is on a geopolitical in-between-ness. The position in between two ideologically, politically or economically divergent entities affects the states' security considerations, maneuvering space and policy perspectives. By cross-examining competing Russian and Western influences Miklóssy and Smith create a persuasive context of regional political choices.

Waking the Neighbour Keir Giles, Susanna Eskola, 2009 Because of both history and geography, the Finnish relationship with Russia is unique in Europe. At the same time the Finnish perception of Russia as a source of security challenges is acute. Finland is engaged in a debate over whether it would be desirable to seek membership of NATO in order to mitigate these challenges. A full and frank debate has been difficult because it is constrained by a range of political and societal taboos; nevertheless there are indicators that a move toward NATO is not impossible in the foreseeable future. If Finland were to opt for joining NATO, this would register in Russian defence and security thinking as a serious concern. Unlike the Baltic accession in 2004, the response from the newly assertive Russia could potentially be swift and damaging. This would also have implications for Russian relations with the EU, of which Finland has been a member since 1995. Many in Finland see the EU as a security provider, and there is confusion in the national debate between EU or Nordic security policy cooperation and an actual defensive alliance. Finland's NATO argument is a complex and multi-faceted one, made even more so by regional and cultural specifics; but it needs to be understood because its result could have a major impact on Russia's relationships with both NATO and the EU.--Page i.
