

La Raja Rio De La Plata

United States National Museum

The Rio de la Plata (El Rio de la Plata) Graham Richard Daborn, P. G. Wells, 1997 The book is a product of the Ecoplata Project, a joint Canada-Uruguay project initiated by and coordinated through the Ocean Studies Program of Dalhousie University. This book is the most recent attempt to summarize the oceanography of the Rio de la Plata, the condition of its environment and the status of the white croaker fishery. The book contains current knowledge of its geology, hydrology and climate, oceanography, environmental quality, plankton and benthos, fish and fisheries biology, the artisanal croaker fishery, and prospects for its future integrated coastal management. The chapters are based on information provided by a team of 30 expert contributors from Uruguay and Canada. There are extensive bibliographies and an index. The book will be a valuable reference source for the Uruguay-Canada Ecoplata Project and for the many public, governmental, educational, scientific and private sector groups interested in integrated coastal management for Uruguay and its coastal neighbours. It should also be of interest to many persons working globally in coastal oceanography and integrated coastal management.
