Changing the Score Hilary Poriss,2009-08-26 This study seeks to explore the role and significance of aria insertion, the practice that allowed singers to introduce music of their own choice into productions of Italian operas. Each chapter investigates the art of aria insertion during the nineteenth century from varying perspectives, beginning with an overview of the changing fortunes of the practice, followed by explorations of individual prima donnas and their relationship with particular insertion arias: Carolina Ungher's difficulties in finding a perfect aria to introduce into Donizetti's *Marino Faliero*; Guiditta Pasta's performance of an aria from Pacini's *Niobe* in a variety of operas, and the subsequent fortunes of that particular aria; Maria Malibran's interpolation of Vaccai's final scene from *Giulietta e Romeo* in place of Bellini's original setting in his *I Capuleti e i Montecchi*; and Adelina Patti's mini-concerts in the lesson scene of *Il barbiere di Siviglia*. The final chapter provides a treatment of a short story, *Memoir of a Song*, narrated by none other than an insertion aria itself, and the volume concludes with an appendix containing the first modern edition of this short story, a narrative that has lain utterly

forgotten since its publication in 1849. This book covers a wide variety of material that will be of interest to opera scholars and opera lovers alike, touching on the fluidity of the operatic work, on the reception of the singers, and on the shifting and hardening aesthetics of music criticism through the period.

Phonetic Readings of Songs and Arias Berton Coffin,1982 Since 1964, the first edition has served singers, teachers of singing, and students of lyric diction as a guide to the correct pronunciation of songs in foreign languages. Lyrics and phonetic transcriptions are presented together so that a song may be correctly articulated from the first reading. The 413 songs included have been carefully selected from Coffin's *The Singer's Repertoire* (1960) and are representative of the most frequently performed vocal repertoire, with songs and arias for all voice classifications. This second edition contains revised German transcriptions with diphthongs altered to be of better acoustical and vocal value in singing. Correlated with Coffin's *Overtunes of Bel Canto* (1980).

Studies on Authorship in Historical Keyboard Music Andrew Woolley,2023-10-31 Authorship is a pertinent issue for historical musicology and musicians more widely, and some controversies concerned with major figures have even reached wider consciousness. Scholars have clarified some of the issues at stake in recent decades, such as the places of borrowing and arranging in the creative process and the wider cultural significance of these practices. The discovery of new sources and methodologies has also opened up opportunities for reassessing specific authorship problems. Drawing upon this wider musicological literature as well as insights from other disciplines, such as intellectual history and book history, this book aims to build on what has already been achieved by focussing on keyboard music. The nine chapters cover case studies of authorship problems, the socioeconomic conditions of music publishing, the contributions of composers, arrangers, copyists and music publishers in creating notated keyboard compositions, the functions of attribution and ascription, and how the contexts in which notated pieces were used affected concepts of authorship at different times and places.
