Early Literacy Instruction John A. Smith,Sylvia Read,2009 Early Literacy Instruction: Teaching Reading and Writing in Today's Primary Grades, 2/e Different from many other books on the market, this introduction to early childhood literacy provides rudimentary and specific aspects of early literacy assessment and develops meaningful strategies for catching struggling young readers before they fall through the cracks. KEY TOPICS: Replete with authentic, first-person classroom descriptions, this introduction to emergent childhood literacy is built upon a five-part literacy instruction framework that is both comprehensive and practical. Each of the five components of the framework--teacher read-alouds, word study instruction, independent reading practice, guided reading instruction and writing workshop--is thoroughly developed in separate chapter discussions. MARKET: For pre-service and practicing elementary school and early childhood educators and literacy counselors.
