Academies, Free Schools and Social Justice Geoffrey Walford, 2017-10-02 Academies were introduced by Labour in 2000 and first opened their doors in 2002, but during Labour's time in power the nature of the Academies changed. At first they were designed to replace existing failing schools but, by 2004, the expectation had widened to provide for entirely new schools where there was a demand for new places. From 2010, under the coalition government, two new types of Academy were introduced. While the original Academies were based on the idea of closing poor schools and replacing them by dramatically redesigned and restructured ones, the 2010 Academies Act allowed existing highly successful state-maintained schools to apply to become Academies as well. Further, while Labour had restricted Academy status to secondary schools, the Coalition extended it to primary and special schools. The result is that there has been a dramatic increase in the number and diversity of Academies. In addition to this, the 2010 Act introduced Free Schools, wherein groups of parents, teachers, or other sponsors can apply to start their own state-maintained, but officially 'independent', schools. These schools can either be completely new or the result of existing private schools applying to become state-maintained. The results of these changes remain under-researched. This book puts forward new research that examines the history and nature of Academies and Free Schools, the processes by which they have come into existence, and their effects in terms of social justice. The contributors do not all speak with one voice, but rather present a diversity of views on these important topics. Included in the collection are the results of research on pupil outcomes and socio-economic segregation; issues of identity and ethos in church academies; the problems of establishing free schools; the history of policy on Academies; and a comparison between Swedish independent schools and Academies and Free Schools. This book was originally published as a special issue of *Research Papers in Education*.

Human Chemistry (Volume Two) Libb Thims, 2007-09-01 Volume two begins with Goethe's theories of affinities, i.e. the chemical reaction view of human life in 1809. This is followed by the history of how the thermodynamic (1876) and quantum (1905) revolutions modernized chemistry such that affinity (the 'force' of reaction) is now viewed as a function of thermodynamic 'free energy' (reaction spontaneity) and quantum 'valency' (bond stabilities). The composition, energetic state, dynamics, and evolution of the human chemical bond $A \rightarrow B$ is the centerpiece of this process. The human bond is what gives (yields) and takes (absorbs) energy in life. The coupling of this bond energy, driven by periodic inputs of solar photons,

thus triggering activation energies and entropies, connected to the dynamical work of life, is what quantifies the human reaction process. This is followed by topics including mental crystallization, template theory, LGBT chemistry, chemical potential, Le Chatelier's principle, Muller dispersion forces, and human thermodynamics.

A Labor of Love, Volume 2 Anna D. Arapakos, 2024-10-18 You hold the second of two volumes of one giant love story! This story is about Arapakos' father and how she came to care for him when he was elderly. There is no more popular Greek myth than the one of the hero Hercules, and while you may not know her father or her, by the time she superimposes her father's saga onto the labors of Hercules, you will! Arapakos' overarching aim is for you and your parents to benefit from what she has to tell you. Hercules and she had much in common: they both wanted to help make things right despite the odds, and both proved victorious. In Volume 2, the roles reverse, and you find Arapakos taking on the part of Hercules as she performs her adaptation of the twelve "Herculean Labors" to care for her father when Huntington's disease began making its mark on his life and person. She retells each labor Hercules undertook before making parallels to what she did for her father. She is confident the herculean myth and her father's story will move you. The circle of love can continue through your actions and a better-informed mind and heart-set for your loved one in need.

For the Children? Erica R. Meiners, 2016-10-15 "Childhood has never been available to all." In her opening chapter of *For the Children?*, Erica R. Meiners stakes the claim that childhood is a racial category often unavailable to communities of color. According to Meiners, this is glaringly evident in the U.S. criminal justice system, where the differentiation between child and adult often equates to access to stark disparities. And what is constructed as child protection often does not benefit many young people or their communities. Placing the child at the heart of the targeted criminalization debate, *For the Children?* considers how perceptions of innocence, the safe child, and the future operate in service of the prison industrial complex. The United States has the largest prison population in the world, with incarceration and policing being key economic tools to maintain white supremacist ideologies. Meiners examines the school-to-prison pipeline and the broader prison industrial complex in the United States, arguing that unpacking child protection is vital to reducing the nation's reliance on its criminal justice system as well as building authentic modes of public safety. Rethinking the meanings and beliefs attached to the child represent a significant and intimate thread of the work to dismantle facets of the U.S. carceral state. Taking an interdisciplinary approach and building from a scholarly and activist platform, *For the Children?* engages fresh questions in the struggle to build sustainable and flourishing worlds without prisons.

Pension Fund Capitalism Leokadia Oręziak,2022-04-10 This book examines the origins and consequences of so-called pension fund capitalism, which has spread around the world since 1981, when the pension system was completely privatized in Chile. The author highlights the driving forces behind the privatization of pensions, its forms and tools used in practice, and the risks and costs related to private pensions. The reader can also learn about the experiences of various developed countries (including the USA, Canada, Australia, and Germany), as well as Latin American (including Chile) and Eastern European countries, related to the privatization of pensions. Particular attention is paid to Poland as an example of a country where such privatization failed completely. This book provides a source of serious reflection on what this privatization has led to, what its real economic and social consequences are and what the likelihood is of reversing it and strengthening the public pension system. Academic researchers and students of economics and finance, as well as social and political sciences, will find the book invaluable in understanding the problems arising from the privatization of pensions. It will also be of interest to professionals: institutions that shape or influence economic and social policy, including political parties, trade unions, non-governmental organizations, the media, and institutions operating on the financial market.
