Janice VanCleave's Super Science Models Janice VanCleave,2004-08-18 Learn a lot about science as you make models showing how things work! A spectacular model of an active volcano . . . a fascinating representation of the solar system . . . scale reproductions of atoms and molecules . . . In Janice VanCleave's Super Science Models, America's favorite science teacher shows you how to make these and other eye-catching science models that will help you show what you know in class or at a science fair! Inside, you'll find easy-to-follow instructions for 25 great models that reveal the worlds of astronomy, biology, chemistry, earth science, and physics. You'll also get helpful hints on displaying your models, including advice on backboards, scale models, stands, and other clever techniques. As with all of Janice VanCleave's books, every project can be created at home or in the classroom with safe, inexpensive materials. Through models of Earth's layers, the states of matter, an electric circuit, and much more, you'll discover how scientists use models to make it easier to describe things and share their ideas. So get ready to have a great time and impress others with what you've learned making these fun, fabulous models!

New Literacies and the English Curriculum Len Unsworth,2011-11-03 In an age where the use of electronic media is expanding and the nature of traditional texts and text-based learning is changing, new literacies are becoming increasingly important in the school classroom. This volume examines how new literacies can be used in the English curriculum, and presents a series of research-based studies applied to every level of school-age education. The chapters examine: early literacy; picture books; the internet; secondary school English; and the problems of assessment in the new literacy age. This forward-thinking volume will be of interest to teachers and academics researching education, literacy, applied linguistics, and social semiotic theory.
