Law and Childhood Studies Michael Freeman, 2012-03-08 Current Legal Issues, like its sister volume Current Legal Problems (now available in journal format), is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and analyses points of controversy in the use, and abuse, of extra-legal arguments within legal theory and practice. Law and Childhood Studies, the fourteenth volume in the Current Legal Issues series, offers an insight into the state of law and childhood studies scholarship today. Focussing on the inter-connections between the two disciplines, it addresses the key issues informing current debates.

Global Literatures and Cultures of Modernity Srirupa Chatterjee, Sharada Chigurupati, 2025-04-29 Global Literatures and Cultures of Modernity: Critical Perspectives from India brings together essays written by academicians and scholars from India to scrutinize how global modernities have been shaped since World War II, from the Indian perspective. It examines the literary musings of Anglophone writers hailing from various parts of the globe whose diverse voices present compelling narratives on modernity vis-à-vis the human condition. This volume brings together critical essays on writers such as Girish Karnad, Anita Desai, Anita Nair, and Jean Arasanayagam to examine the South Asian experience; by Chimamanda Ngozi Adichie and Naguib Mahfouz to explore the African and Arabic world order; by Jane Harrison and Wesley Enoch to address the Australian aboriginal condition; by William Golding, Kazuo Ishiguro, and Sarah Kane to scrutinize British cultural politics; by Jamaica Kincaid and Elizabeth Acevedo to highlight Latin American and Caribbean modernity, and last but not the least, by John Updike, Cormac McCarthy, and Mary Gordon to analyze North American politico-religious experiences of modernity. The diverse themes in this book therefore touch upon historical trauma, religious revisioning, masculinity, feminist debates, gender studies, ethnic discrimination and diversity, and caste and class politics, among many others. The book's varied

themes are united by the fact that they all converse with global and transnational dynamics shaped by post-war modernity that define our world today. The book crafts narratives on contemporary global literatures and the modern conditions they represent and does so from the vantage point of postmillennial Indian literary scholarship.

Wicked Valuations Michael McDermott, 2018-07-16 Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north, south, east to west. This book demonstrates the limitations of science and, in particular economics, as the foundation on which valuations are traditionally based. It demonstrates the importance of and provides justification for the personal, cultural values and norms which underpin our assessment of value, and the fact that these vary across the world. In *Wicked Valuations* Michael McDermott develops a means of engaging with highly complex valuation problems. His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia-Pacific, while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary landscapes.

Lord of the Flies - Literature Kit Gr. 9-12 Chad Ibbotson, 2013-12-10 Witness the downfall of humanity and loss of innocence when a group of young boys descend into savagery. Challenging questions require students to really think deeper about the content of the book. Identify any part of today's society that might be considered 'island-like', and determine what this says about human nature. Put events in order as they happened when the boys are first stranded and must figure out how to survive. Complete sentences from the novel with their missing vocabulary words. Give meaning to the author's use of 'mankind's essential illness', and describe how this has affected the boys on the island. Map out Ralph's mindset by identifying some of the things that he reflects on. Create a shipwreck plan with a group that will get food, water, shelter, and possible rescue. Aligned to your State Standards and written to Bloom's Taxonomy, additional crossword, word search, comprehension quiz and answer key are also included. About the Novel: *Lord of the Flies*, written by Nobel Prize-winner William Golding, is a story about a group of boys stranded on a deserted island, who must establish order amongst themselves. Shortly after crashing onto a deserted island, a group of pre-adolescent boys form a community, electing Ralph to be their leader. As his first act, Ralph proclaims the boys will have fun and keep the signal fire going. All is well until thirst for power draws one boy to form his own tribe of savages. Armed with the fear of a fictitious beast, this group of boys descend into further savagery with sacrifice and death. The story reaches its climax as the beast is revealed to be within each

boy's heart, and Ralph is forced to flee for his survival.

Mind Shift John Parrington, 2021-04-22 John Parrington argues that social interaction and culture have deeply shaped the exceptional nature of human consciousness. The mental capacities of the human mind far outstrip those of other animals. Our imaginations and creativity have produced art, music, and literature; built bridges and cathedrals; enabled us to probe distant galaxies, and to ponder the meaning of our existence. When our minds become disordered, they can also take us to the depths of despair. What makes the human brain unique, and able to generate such a rich mental life? In this book, John Parrington draws on the latest research on the human brain to show how it differs strikingly from those of other animals in its structure and function at a molecular and cellular level. And he argues that this 'shift', enlarging the brain, giving it greater flexibility and enabling higher functions such as imagination, was driven by tool use, but especially by the development of one remarkable tool - language. The complex social interaction brought by language opened up the possibility of shared conceptual worlds, enriched with rhythmic sounds, and images that could be drawn on cave walls. This transformation enabled modern humans to leap rapidly beyond all other species, and generated an exceptional human consciousness, a sense of self that arises as a product of our brain biology and the social interactions we experience. Our minds, even those of identical twins, are unique because they are the result of this extraordinarily plastic brain, exquisitely shaped and tuned by the social and cultural environment in which we grew up and to which we continue to respond through life. Linking early work by the Russian psychologist Lev Vygotsky to the findings of modern neuroscience, Parrington explores how language, culture, and society mediate brain function, and what this view of the human mind may bring to our understanding and treatment of mental illness.
