

Personal Philosophy Of Education

Ronald Swartz

A Personal Philosophy of Education Debbie Barry, 2013-10-04 My personal philosophy of education is an eclectic blend of several different philosophies. Because of this, I am able to adapt to a variety of teaching situations, and to apply the concepts of various philosophies in my teaching. The purpose of education is to prepare students to be responsible, productive members of society, and to preserve and perpetuate the important thoughts and ideals of the society. As such, education simultaneously serves both the individual student and the society. Teachers and students have specific roles to play in education, and neither group functions effectively without the other group. Teachers facilitate student learning and students participate as consumers in their education. Curriculum should be structured to give every student a firm foundation in basic subjects and to allow students to diversify their educations according to their strengths and interests. Instruction should feature the organic learning associated with mixed-age groups so that learning can be accomplished naturally and so that students retain as much education as possible.

Philosophy of Education in Action David W. Nicholson, 2022-02-06 *Philosophy of Education in Action: An Inquiry-Based Approach* (Second Edition) is an innovative introductory text that invites readers to explore philosophy of education through the lens of their own observations and experiences. Using the Wonder Model of Inquiry, readers investigate the purposes of education, how schools are designed to fulfill those purposes, and the influence of philosophy on educational practices. Grounded in authentic classroom vignettes and supported by examples from actual schools and educational programs, readers think critically and creatively about philosophical issues. Probing questions analyze the curriculum, examine pedagogy, conceptualize the role of the teacher and student in the learning process, and explore the role of school organization and design. Readers are guided to reflect upon their own practices and articulate their own philosophical beliefs. Readers also imagine and design a hypothetical school using project-based methods to interpret, synthesize, and evaluate different educational philosophies. The Continuum of Educational Philosophy locates practices in relation to philosophical perspectives. The Second Edition includes updated sources and examples of schools and programs that represent different philosophical perspectives. In addition to applying the 3Cs criteria of evaluation, two new chapters highlight voices that respond to and challenge different educational philosophies. The final chapter adds guidance on how to

construct and compose a personal philosophy of education statement.

Issues and Alternatives in Educational Philosophy George R. Knight, 1989

Introduction to Education William Edwin Segall, Anna Victoria Wilson, 2004 Introduction to Education, Second Edition is written for students beginning their study in education. As the school population increasingly reflects the diversity of America's population, many prospective teachers, typically from the middle classes, will be unprepared for the diverse classrooms they will inevitably encounter. This text helps students prepare to be teachers in a pluralistic society whose classrooms represent an increasingly varied set of cultural histories and values. Introduction to Education, Second Edition identifies and examines key educational topics and issues: A history of Education that goes beyond the standard Puritan background and begins instead with indigenous Americans and the influence of the Spanish., Surveys of a broad spectrum of children's backgrounds, including experiences with drugs, poverty, and lack of access to vital cultural currency like the Internet., And provides numerous pedagogical aides:, Reflective in-text questions that challenge students to think beyond their own cultural backgrounds and to develop an appreciation for a variety of different cultures, Student Web materials including supplemental readings involving issues in contemporary American education, in-text case studies, An issues-based guide to websites on hot topics like vouchers and the No Child Left Behind Act, Instructor's Manual with Test Bank (still under construction)

The Therapy of Education P. Standish, P. Smeyers, R. Smith, 2006-12-06 The idea of education as therapy goes back to ancient times. Today, it is understood that the role of the teacher comprises aspects of therapy directed towards the child. But to what extent should this relationship be developed, and what are its concomitant responsibilities? This book offers a challenging philosophical approach to these issues.

Physical Education, Exercise and Sport Science in a Changing Society William Freeman, 2011-01-21 Physical Education, Exercise and Sport Science in a Changing Society, Seventh Edition provides a current, complete, and balanced introduction to the fields of physical education, sport, and exercise science. It gives a thorough overview of the varied elements within the disciplines, how they came to be, and how they are developing, including the conflicts over field, major, and departmental names. It also examines the developing sub-disciplines within physical education, sport, exercise science, and kinesiology. The Seventh Edition has been thoroughly revised and updated to represent the state and potential of the field of physical education today. It surveys both teaching and non-teaching careers and addresses technology, current issues, and future trends. Instructor Resources: PowerPoint Presentations, Instructor's Manual, TestBank

From Socrates to Summerhill and Beyond Ronald Swartz, 2016-06-01 In From Socrates to Summerhill and Beyond:

Towards a Philosophy of Education for Personal Responsibility, Ronald Swartz offers an evolving development of fallible, liberal democratic, self-governing educational philosophies. He suggests that educators can benefit from having dialogues about questions such as these: 1). Are there some authorities that can be consistently relied upon to tell school members what they should do and learn while they are in school? 2.) How should the imagination of social theorists be both used and checked in the development and implementation of innovative educational reforms? 3.) How can teachers in personal responsibility schools help their students learn? These questions are representative of problems that Swartz raises in his book. Swartz identifies four educational programs as personal responsibility schools. These are Little Commonwealth (Homer Lane); Summerhill (A.S.Neill); Orphans Home (Janusz Korczak) and Sudbury Valley School (Daniel Greenberg). Swartz then suggests that these learning environments create social institutions that are liberal, democratic, and self-governing and therefore endorse the policy of personal responsibility. This policy states: All school members, students included, are fallible authorities who should be personally responsible for determining their own school activities and many policies that govern a school. Schools which incorporate this policy can interchangeably be referred to as personal responsibility, self-governing, or Summerhill style schools. In providing an historical and philosophical understanding of Summerhill style schools, Swartz suggests that these educational alternatives have intellectual roots in the ideas associated with Socrates as portrayed in Plato's Apology. Specifically, in personal responsibility schools teachers are not viewed as authorities who attempt to transmit wisdom to their students. Rather, self-governing schools follow the Socratic tradition which claims that teachers can be viewed as fallible authorities who attempt to engage students in dialogues about questions of interest to students. The interpretation of Plato's works used by Swartz can be found in Karl Popper's The Open Society and Its Enemies. Swartz has also been significantly influenced by the educational writings of Bertrand Russell and Paul Goodman. Goodman's Compulsory Miseducation makes it clear that schools which follow in the tradition of Summerhill compete with the educational programs that are an outgrowth of John Dewey's writings. In summary, Swartz's book aims to engage educators in dialogues that will lead to improved educational theories and practices.

History, Philosophy and Science Teaching: A Personal Story Michael R. Matthews, 2021-06-02 This book is an historical narrative of academic appointments, significant personal and collaborative research endeavours, and important editorial and institutional engagements. For forty years Michael Matthews has been a prominent international researcher, author, editor and organiser in the field of 'History, Philosophy and Science Teaching'. He has systematically brought his own discipline training in science, psychology, philosophy of education, and the history and philosophy of science, to bear upon theoretical, curricular and pedagogical issues in science education. The book includes accounts of philosophers who greatly influenced his own thinking and who also were personal friends - Wallis Suchting, Abner Shimony, Robert Cohen, Marx Wartofsky, Israel Scheffler, Michael Martin and Mario Bunge. It advocates the importance of clear writing and avoidance of

faddism in both philosophy and in education. It concludes with a proposal for informed and enlightened science teacher education.
