Life is not what it seems in the Arab world, her experiences lead her to be insightful to the 'unspoken' Arabic culture. Janey meets a local Emirati whom she believes to be a successful businessman, only to subsequently discover that he is a prominent politician, closely related to the royal family. Attractive and vivacious in her midlife she never expects to find true old-fashioned romance, love, or erotic encounters of the third kind! Intrigued and excited she is drawn into a highly dangerous liaison that she has to protect. Utterly fearless she eventually has to defend her newfound lover from the militant organisation Hezbollah. Janey finds herself reflecting on her own naivety in a funny and heartfelt manner, with her man's high libido and her personal maid's nurturing ways. In contrast to the emotional bleakness of life in North Yorkshire, her new world of wealth, status and wild-pace living has taught her survival and given her the strength to regain her power as a woman. *Singing in Silence* is a political erotic thriller that also captures a tender love.

Science and Religion United Ulrich A. K. Betz,2024-05-30 This book offers a fresh perspective on how science and religion are connected, and how prayer aligns with the laws of nature. It explores a holistic worldview where science and religion complement each other, shedding light on life, society, and philosophical and societal concerns. We are born into a world full of mysteries that we only partially understand. We don't know where we are coming from, we don't know why we live, and we don't know where we will go. We don't know how everything started; we even don't know what "everything" really is. We are living in an era of rapid change marked by disruptive technologies, like artificial intelligence and computers. Combined with a perception that the old wisdom transferred to us by religion is outdated, traditional values and institutions that had worth and power over many centuries are now losing their appeal. Science has made remarkable progress but can't answer life's most profound questions about our origins, purpose, and destination - why do we live and what should we do? In this book, the author begins with an overview of science, our understanding of the universe, highlighting gaps in our knowledge, like what started the Big Bang, followed by examples of successful scientific achievements and insights into the limits of science. In the subsequent chapters, the author examines topics such as mind over matter and the coexistence of

evolution, creation, natural laws, and miracles. An attempt to answer the theodicy question is also provided in this book, where the author connects new scientific discoveries with ancient religious wisdom. The book concludes with a chapter devoted to innovation and a call for building a better world. This book is a compelling read for scholars, professionals, and curious laymen alike, ready to expand their horizons.

Soul Garden Hope Schneir, Sia Hoyt, 2024-11-27 The power of a woman is most concretely observed in the seeds she plants, day after day, in the lives of those around her. Soul Garden is a sizable collection of personal stories, essays, poems, and recipes written to cultivate the motherly role of women by offering inspiration, camaraderie, and encouragement. Contributors from across the country and around the world invite readers to put away their screens and to pick up this lovely, tangible book, in which they can find nourishment for the soul and tips for practical life. Among the nine chapters are "Nurture", which encourages women in their call to care for the children and other people God has placed in their lives; "Ponder", which considers the lessons, blessings, and challenges of motherhood; "Dwell", which suggests ways to create a beautiful home, regardless of a woman's budget; and "Fiat", which honors the Blessed Virgin Mary as the model woman. Soul Garden aims to strengthen the heart of the mother, thereby strengthening the heart of the Church and of society itself.

Paradise Divided Alex Klaushofer, 2010-11-26 This timely portrait of Lebanon exposes the fault lines that underlie the current crisis in the Middle East, and charts the country's attempts to rebuild a fragile peace after its long civil war and

recent conflict with Israel. Part reportage, part travel narrative, *Paradise Divided* chronicles the delicate web of relationships that make up contemporary Lebanese society. Drawing on interviews with community leaders and relationships with ordinary people, it reveals a richly-textured social and religious fabric in which Sunni and Shia Muslims, Druze and Christians of all kinds, from Maronite Catholics to evangelical Protestants, strive to maintain a delicate balance. It offers an insight into how Lebanon's religious communities, their identities formed by history, landscape and their relationships with one another, came to be what they are today—and how their different perspectives can lead to potentially destructive tensions. What emerges is a quintessentially Middle Eastern form of coexistence, poised between tolerance and sectarianism—a theme powerfully developed through the author's privileged access to the normally secretive Druze. The reader follows the country's changing fortunes after the assassination of former Prime Minister Rafik Hariri, the subsequent pro-democracy movement and withdrawal of Syrian forces from Lebanese soil. The final chapters examine the aftermath of Israel's military campaign and the emergence of the new battle dividing Lebanese society as opposing camps struggle to have their vision for Lebanon made reality. *Paradise Divided* opens a window onto a country little-visited by Westerners for decades, and one very different from the war-torn images of the Middle East that dominate our television screens. Offering a unique view of the struggle between sectarianism and tolerance, and the relationship between the Arab world and the West, it is a book which sheds light on some of the central issues of our time.
