Becky Kemery

The Complete Yurt Handbook Paul King, 2001 The yurt or ger is a low-impact structure that causes no permanent damage to the land on which it is pitched. It is easy to erect and can be taken down in an hour. It is cool in summer and, with a stove, warm in winter. For centuries, people throughout central Asia have made yurts their homes. Robust and versatile, the yurt has evolved into the ultimate portable dwelling. Yurts are perfect for offices, summer houses, meditation spaces, spare rooms, or just beautifully satisfying spaces to be in! Join the thousands of North Americans who are discovering the many virtues of the yurt. Part One of the book delves into the history of the yurt and the principles behind its construction, and explores modern life in a Mongolian ger and the culture and etiquette of ger living. Part Two gives fully illustrated and detailed instructions on how to make several of the most popular types of yurt, including the weekend yurt. With a few common wood-working tools, even an absolute beginner could build the frame for this simple, elegant structure.

Yurts Becky Kemery, 2006 Yurts: Living in the Round journeys from Central Asia to modern America and reveals the history, evolution, and contemporary benefits of yurt living. One of the oldest forms of indigenous shelter still in use today, yurts have exploded into the twenty-first century as a multi-faceted, thoroughly modern, utterly versatile, and immensely popular modern structure whose possibilities are still being explored. Kemery introduces the innovators who redesigned the yurt and took it from back country trekking and campground uses to modern permanent homes and offices.

Healing Appalachia Al Fritsch, 2007-05-11 *Healing Appalachia* is a practical guide for environmentally conscious residents of Appalachia and beyond. It is also the first book to apply "appropriate technology," or the most basic technology that can effectively achieve the desired result, to this specific region. Authors Al Fritsch and Paul Gallimore have performed over 200 environmental resource assessments in thirty-three states. They bring this knowledge to bear as they examine thirty low-cost, people-friendly, and environmentally benign appropriate technologies that can be put to work today in Appalachia. They discuss such issues as renewable energy and energy conservation, food preservation and gardening, forest management, land use, transportation, water conservation, proper waste disposal, and wildlife protection. They pay close attention to the practicality of each technique according to affordability, ease of use, and ecological soundness. Their subjects range from solar home heating to greenhouses, from aquaculture to compost toilets, from organic gardening to

wildlife restoration and enhancement, and from solar cars to microhydropower facilities. Their discussions of each topic benefit from the knowledge gained from thirty years of practical experience at environmental demonstration centers and public interest and educational organizations. Each section of the book includes details on construction and maintenance, as well as resources for locating further information, making this an essential volume for everyone who cares about the future of Appalachia.

Mongolian Cloud Houses Dan Frank Kuehn,2006 A guide to building a Mongolian cloud house, this title presents new techniques and information for building a yurt, including a list of commercial yurt manufacturers, tools, and materials.
