Inside the Criminal Mind Stanton E. Samenow, 2004

**Summary of Stanton E. Samenow's Inside the Criminal Mind** Everest Media, 2022-04-03T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 There is a long-standing belief that criminals are victims of sociological, psychological, or biological factors over which they have little or no control. But as I worked with criminals, I found that they were making decisions based on thinking patterns rather than causes. #2 The environment continues to be blamed for causing people to commit crimes, and the most common example is exposure to violence in entertainment. But millions of people watch violence in films and on television programs, and no one is turned into a killer because of it. #3 The causes of criminal behavior are extremely complex, and there is no single factor that explains it. To ask why any crime occurs is like asking why human nature is what it is. #4 The notion that poverty causes crime is not limited to the United States. In 2005, the United Nations General Assembly cited the crime and poverty trap to which certain regions of the world are vulnerable. And in 2006, Joseph Donnermeyer and his colleagues wrote that social disorganization facilitates crime in both rural and urban areas.

*The Myth of the Out of Character Crime* Stanton E. Samenow, 2007-10-30 From time to time, into the news burst accounts of regular people who commit crimes that seem totally out of character according to those who know them well. Lee Malvo, one of the D.C. snipers, was known to his friends and family as a smart, promising man. Steven, was a talented, young scientist with no criminal record. No one suspected he was capable of injuring another--until he was arrested for abducting a man, handcuffing him, and threatening to blow off his head with a pistol. What makes these otherwise stable and respected men and women commit crimes? Why do those who know them best not see the signs? Are there clues people can look out for when a person is about to snap? What in the psychological makeup of defendants resulted in their committing crimes? Here, a seasoned forensic psychologist delves into the psyches of these otherwise normal people, whom he has treated and researched for many years. With first-hand experience interviewing and treating such offenders, Samenow is able to offer numerous case examples of everyday people committing extraordinary crimes. He reveals the significant clues that help to

unmask these criminals and the seemingly mundane aspects of their daily lives. The way a person handles money, consumption of alcohol, sexual history, marital conflicts, job history and performance, interests and hobbies, reading preferences, ambitions and goals, and reactions to frustrations all contribute to the factors leading up to the criminal act. By probing into these and other aspects of the offenders' lives, the author finds a context for the crimes they commit. He concludes that the out of character crime does not exist, that the crime is merely the outer manifestation of what lies beneath the surface. By taking readers through the steps necessary to understand these criminals, the author shows how we can all read the signs before it is too late. He uses real life examples in every chapter to illustrate his points and readers will come away with a better understanding of how these criminals operate.

*Basic Concepts in Criminology* Asongwe N. Thomas, 2014-04-22 Basic Concepts in Criminology is an introduction to criminology. It is intended to serve as resource material for prospective students of criminology and particularly for law enforcement officers in training and in the field. Criminology as a social science discipline is structured from a combination of concepts of sociology, psychology, and law all relevant subjects to the law enforcement profession. Remarkably, criminology is not very popular as a stand-alone subject among disciplines of choice for undergraduate students or even for those going in for graduate studies. Instead, what we notice in most universities curricula are related disciplines, like criminal justice, criminal investigation, crime scene investigation, forensic, law enforcement, and so forth. Material contained in this book will be particularly useful to law enforcement officers; the Police, Corrections, and Security officers. In this book, I have attempted to approach and make this subject much easier and interesting to prospective students of Criminology in general and to law enforcement officers in particular, to whom knowledge of this subject is an important professional asset. I hope it will stir and arouse their interest and that of prospective students of Criminology in general.

Stevens, 2008-08-15 Introduction to American Policing: An Applied Approach connect criminal justice, criminology, and law enforcement knowledge to the progress of the police community. Case studies, narratives from violators, and current research coverage help students recognize the central theories and practical (documented) realities of American law enforcement. Students are encouraged to consider the way some believe policing should be while examining evidence about the way it is. This text will also provide a current description of local and state police organization partnerships with federal organizations and of the efforts accomplished by federal law enforcement agencies including the Department of Homeland Securities (DHS).

**The Dynamics of Murder** R. Barri Flowers, 2012-11-26 In recent years, there has been a surge in school shootings, workplace homicides, hate violence, and deadly terrorist attacks in the United States. This has resulted in a greater focus on homicidal behavior, its antecedents, ways to recognize warning signs of at-risk victims and offenders, and preventive measures. It has also led to increased efforts by lawmakers to create and pass tough crime legislation as well as improved federal, state, and local law enforcement response to murder and other violent crimes. *The Dynamics of Murder: Kill or Be Killed* is a multifaceted probe of murder offenses, offenders, victims, and characteristics of homicide in American society. This book breaks new ground in homicide studies by examining issues generally ignored or neglected among researchers. Topics include murders occurring in the workplace and in schools, those perpetrated by gangs and terrorists, those incited by bias, and intimate and intrafamilial murders. The book discusses sexual killers, serial and mass murderers, and suicide. It also examines psychological and sociological theories on murder and violence, as well as the increasing role the Internet plays in these crimes. Case studies of actual murderers are included, including serial killers Gerald and Charlene Gallego, mass murderer Byran Koji Uyesugi, the murder/suicide case of Sahel Kazemi, and the intrafamilial murders committed by Charles Stuart and Sarah Marie Johnson. A comprehensive exploration of the crime of murder in American society, this fascinating study is an essential resource for researchers, criminologists, and other professionals in a wide range of disciplines.

Becoming a Critical Thinker Vincent Ryan Ruggiero, 2006 *Becoming a Critical Thinker* breaks up critical thinking into a series of cumulative activities, taking a student-as-consumer-of-information perspective that encourages students to apply the skills outlined to their own lives. This unique approach has made this text a staple of many critical thinking courses. The Fifth Edition strengthens the connection between critical thinking and career preparation with new material throughout the text that focuses on communication and the evaluation of evidence in the workplace. A new section in Chapter 6 called *Thinking Critically about Careers* addresses practical ways to apply critical thinking to career decisions. With the goals of improving students' sense of self-empowerment and their ability to communicate effectively in any situation, this text helps create a flow from the fundamentals of thinking to the exploration of arguments and evidence. A concise structure makes the text a useful supplement to any student success course.

*Straight Talk about Criminals* Stanton E. Samenow, 2002-10-01 Is there a genetic predisposition to crime? Should mental illness be taken into account? Do family and social environments have a role? Do people become abusers because they have been abused? How can people who do terrible things consider themselves good people? What should someone involved in a relationship with a criminal know? Stanton Samenow, co-author of the widely respected three-volume study of *The Criminal Personality*, has collected the questions posed by audiences during his speaking engagements of the past twenty-eight years about causes, characteristics, and treatments of antisocial behavior. Now he draws on his research and clinical experience with hundreds of men, women, and children to offer no-frills answers that embody his informed perspectives on some of the toughest policy issues facing individuals, institutions, and governments today. The War Against the Family William Douglas Gairdner, 1992 Believing it is high time for someone to speak out in defense of the family, William Gairdner, the author of *The Trouble with Canada*, has turned his attention to what he calls the civil war of values that is weakening the soul of the family in Canada. Among his findings: Traditional marriage is being demoted in our children's textbooks as only one choice among many types of family relationships; Massive funding is given to radical lobby groups devoted to destroying the family, while those supporting it go begging; Sex education, at one time the concern of families, has become the property of sexologists and peer groups; The mainline churches have abandoned souls for political causes and pagan theories; The law and the courts of the land are decimating the traditional privileges of the family in the name of individual rights. In writing that is vigorous and compelling, Gairdner traces the war against the family to a political ideology springing from Plato, Rousseau, and a utopian liberalism that has become a caricature of itself, everywhere promoting rights but forgetting duties. Powered by this ideology, the modern State, eager for votes and hostile to freedom, effectively weakens the family unit, which it sees as a bastion of privacy, privilege, and authority. In *The War Against the Family*, Gairdner throws down the gauntlet, forcing into the open a much-needed debate about the future of the family in Western societies. The family of today and future generations are sure to benefit. - Jacket flap.
