The Handbook of Innovation and Services F. Gallouj, F. Djellal, 2011-11-01 'This book represents a significant step towards dealing with the lacuna constituted by the inadequacy of the literature on the services. And, as such, it approaches its task from a variety of directions.' From the foreword by William J. Baumol, New York University, US 'The Handbook of Innovation and Services is an exceptional volume. Its contributors, including Faïz Gallouj, William Baumol, Jean Gadrey, and Pascal Petit, are among the major thinkers in both the fields of the economics of services and the economics of innovation. Selected topics include the cost disease, services innovation in the global economy, social innovation in the services, and innovation and employment in services. The book, I am sure, will become a standard reference volume in both these fields in the ensuing years.' Edward Wolff, New York University, US This Handbook brings together 49 international specialists to address an issue of increasing importance for the world's post-industrial economies; innovation as it relates to services. Contemporary economies have two fundamental characteristics. Firstly, they are service economies in as much as services account for more than 70 per cent of the wealth and jobs in most developed countries. Secondly, they are innovation economies as recent decades have seen an unprecedented development of scientific, technological, organisational and social innovations. This Handbook expertly links these two major characteristics in order to investigate the role of innovation in services, an issue that until now has been inadequately explored and one that poses many theoretical and operational challenges. This comprehensive volume encompasses the views of eminent scholars from a range of disciplines including economics, management, sociology and geography, and draws on a number of different analytical and methodological perspectives. With its multi-disciplinary approach this Handbook will be an invaluable reference source for academics and students in the fields of economics, management and the geography of services and innovation. Public authorities and managers in the service sector will also find this book fascinating.

Global Business Yongsun Paik, Dong Chen, William Newburry, Dan Prud'homme, 2025-09-18 This textbook is designed to help students recognize and analyze key issues in global business by bridging theory with real-world applications. Divided into three parts, it explores critical aspects of global business, introducing readers to relevant topics and examining core concepts and their applications through about 40 case studies. Since the first edition was published in 2017, the global business landscape has undergone profound transformations, reshaping how companies operate, compete, and innovate. This

new edition incorporates critical developments in the aftermath of the COVID-19 pandemic to provide leaders with a comprehensive understanding of today's global business environment. New and updated case studies illustrate the magnitude and complexity of global business, highlighting the roles of various stakeholders. In addition to insights on emerging markets, this edition sheds new light on reglobalization, economic nationalism and geopolitical tensions, technological innovation and digital transformation, and sustainability, enabling readers to stay informed about ever-evolving trends. By demonstrating how theories and concepts work in real-world business settings, this book provides readers with the essential tools to analyze and respond to global business challenges effectively. Undergraduate students looking for an introduction to international business and graduate students looking to apply their knowledge will find Global Business stimulating, as it demonstrates how theories and concepts work in realworld business settings.

*The Moving Frontier* Lois Labrianidis, 2019-06-04 Originally published in 1992 and based on two theoretical approaches: the Global Commodity Chain and the Global Production Network, this book investigates the multitude of processes, as well as diverse consequences of global integration upon industries, regions, enterprises and employees. In doing so, it draws from the experience of Western and Eastern and South-eastern Europe. These European cases are complemented with evidence from Kenya, Thailand as well as US, China, India and Mexico. The book explores multiple causes of decentralization, arguing beyond the pursuit of cheap and adaptable labour. It goes on to argue that the effects of delocalization within Europe, unlike those in the rest of the developed world, are less negative than usually portrayed. It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world.

**Outsourcing in European Emerging Economies** Łukasz Mamica, 2020-11-29 Drawing on a range of European cases, this edited volume analyses the offshoring and outsourcing of foreign companies, with a focus on territorial embeddedness. The book opens by developing a theoretical framework and then presents a range of international case studies exploring the experiences of the service hub cities of Brno, Bratislava, Budapest, Krakow, and Prague. Attention is also given to internal and external determinants of embeddedness, with chapters on the employee perspective, the Fintech industry, corporate social responsibility, and the role of universities. This volume will be of interest to advanced students and researchers in regional economics, economic geography, innovation studies, industrial economics, European economics, and international business.
