**The Long Ships** Frans G. Bengtsson, 2010-07-06 A beloved Viking saga and masterpiece of historical fiction, *The Long Ships* is a high spirited adventure that stretches from Scandinavia to Spain, England, Ireland, and beyond. Frans Gunnar Bengtsson's *The Long Ships* resurrects the fantastic world of the tenth century AD when the Vikings roamed and rampaged from the northern fastnesses of Scandinavia down to the Mediterranean. Bengtsson's hero, Red Orm—canny, courageous, and above all lucky—is only a boy when he is abducted from his Danish home by the Vikings and made to take his place at the oars of their dragon-prowd ships. Orm is then captured by the Moors in Spain, where he is initiated into the pleasures of the senses and fights for the Caliph of Cordova. Escaping from captivity, Orm washes up in Ireland, where he marvels at those epicene creatures, the Christian monks, and from which he then moves on to play an ever more important part in the intrigues of the various Scandinavian kings and clans and dependencies. Eventually, Orm contributes to the Viking defeat of the army of the king of England and returns home an off-the-cuff Christian and a very rich man, though back on his native turf new trials and tribulations will test his cunning and determination. Packed with pitched battles and blood feuds and told throughout with wit and high spirits, Bengtsson's book is a splendid adventure that features one of the most unexpectedly winning heroes in modern fiction.

**Music in Films on the Middle Ages** John Haines, 2013-10-30 This book explores the role of music in the some five hundred feature-length films on the Middle Ages produced between the late 1890s and the present day. Haines focuses on the tension in these films between the surviving evidence for medieval music and the idiomatic tradition of cinematic music. The latter is taken broadly as any musical sound occurring in a film, from the clang of a bell off-screen to a minstrel singing his song. Medieval film music must be considered in the broader historical context of pre-cinematic medievalisms and of

medievalist cinema's main development in the course of the twentieth century as an American appropriation of European culture. The book treats six pervasive moments that define the genre of medieval film: the church-tower bell, the trumpet fanfare or horn call, the music of banquets and courts, the singing minstrel, performances of Gregorian chant, and the music that accompanies horse-riding knights, with each chapter visiting representative films as case studies. These six signal musical moments, that create a fundamental visual-aural core central to making a film feel medieval to modern audiences, originate in medievalist works predating cinema by some three centuries.
