Mathematical Carnival Martin Gardner, 2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, first published in 1975, contains columns published in the magazine from 1965-1967. This 1989 MAA edition contains a foreword by John H. Conway and a postscript and extended bibliography added by Gardner for this edition.

Current Catalog National Library of Medicine (U.S.), First multi-year cumulation covers six years: 1965-70.

Across the Secular Abyss William Sims Bainbridge, 2007-01-01 Across the Secular Abyss draws upon the best social-scientific evidence to understand profound religious changes occurring in advanced societies today, as previously separate fields of science converge, leaving progressively less room for faith. It finds that the positive functions of religion have been exaggerated, are declining, and are replaceable by benefits from new Transhumanist technologies; however, serious concerns are raised whether atheism is compatible with long-term survival of the human species, given falling birth rates.

Paranormal Borderlands of Science Kendrick Frazier, 2023-10-17 Headlines and television news reports feature accounts of reincarnation, the predictions of astrologers, and psychic miracles. Citizens report UFO sightings. Police departments call on psychics to provide clues in baffling crimes. From every available information source, the public is bombarded with unsubstantiated claims of paranormal phenomena. How much of the evidence is reliable? What is the truth behind these claims? Paranormal Borderlands of Science is an exciting, well-informed examination of the most publicized and exotic claims of astrology, ESP, psychokinesis, precognition, UFOs, biorhythms, and other phenomena. Written by respected psychologists, astronomers and other scientists, philosophers, investigative journalists, and magicians, the 47 articles in this superb collection present a skeptical treatment of pseudoscientific claims - an aspect often sorely neglected in

sensationalized media reports. This book is an effort to help readers sort fact from fiction and sense from nonsense among the astonishing variety of assertions labeled paranormal. Never before published in book form, the essays in this anthology originally appeared in the *Skeptical Inquirer*, a leading magazine devoted to the critical investigation of pseudoscience from a scientific viewpoint. Among the contributors are: Isaac Asimov (distinguished science fiction author), Martin Gardner (Scientific American columnist), James Randi (The Amazing Randi), Philip Klass (noted UFO skeptic), Scot Morris (Omni), and James Oberg (NASA). An essential contribution to skeptical literature, this book will be of lasting value to all those wishing to balance the case for paranormal claims by reading the dissenting critics.
