

Ceci Nest Pas Une Pipe

Joseph P. Huston, Marcos Nadal, Francisco Mora, Luigi F. Agnati, Camilo José Cela Conde

The Sense of Dissonance David Stark, 2011-08-01 What counts? In work, as in other areas of life, it is not always clear what standards we are being judged by or how our worth is being determined. This can be disorienting and disconcerting. Because of this, many organizations devote considerable resources to limiting and clarifying the logics used for evaluating worth. But as David Stark argues, firms would often be better off, especially in managing change, if they allowed multiple logics of worth and did not necessarily discourage uncertainty. In fact, in many cases multiple orders of worth are unavoidable, so organizations and firms should learn to harness the benefits of such heterarchy rather than seeking to purge it. Stark makes this argument with ethnographic case studies of three companies attempting to cope with rapid change: a machine-tool company in late and postcommunist Hungary, a new-media startup in New York during and after the collapse of the Internet bubble, and a Wall Street investment bank whose trading room was destroyed on 9/11. In each case, the friction of competing criteria of worth promoted an organizational reflexivity that made it easier for the company to change and deal with market uncertainty. Drawing on John Dewey's notion that perplexing situations provide opportunities for innovative inquiry, Stark argues that the dissonance of diverse principles can lead to discovery.

The Mind's Sky Timothy Ferris, 2009-12-16 The bestselling author of *Coming of Age in the Milky Way* delivers fascinating essays on the human mind, the search for extraterrestrial (and thus nonhuman) intelligence, comet strikes as a source of species extinction, near-death experiences, apocalyptic prophecies, information theory, and the origin of laughter. Praise for *The Mind's Sky* "It is a joy to read *The Mind's Sky*. What a sense of humility in the face of mystery—the spirit of Ulysses, as Tennyson put it, determined 'to strive, to seek, to find and not to yield'—and sense of poetry too!"—John Archibald Wheeler, physicist, Princeton University "A few chapters into this wonderful book I suddenly realized that I was taking wider views of my own mind's sky than I have enjoyed in a long time. Ferris illuminates (among other matters) the mysteries of laughter, nirvana, common sense, and Joe Montana. He makes us think big thoughts."—Jonathan Weiner, author of *The Next 100 Years* and *Planet Earth* "One of our best and most imaginative writers, Timothy Ferris has never been afraid to tackle big themes. *The Mind's Sky* is a dazzling and provocative synthesis of inner and outer space. This book is sure to be as controversial as it is elegant."—Dennis Overbye, author of *Lonely Hearts of the Cosmos*

Secularism and Freedom of Religion in Italy Maria Cristina Ivaldi, 2025-02-11 The display of religious symbols in the

public space has been the subject of much debate. This book provides an overview of the presence of religious symbols in Italian public institutions from a legal standpoint. The situation is analysed from the perspective of the principles of laicità/secularism, as defined by the Constitutional Court, and freedom of religion. It is argued that while the display of religious symbols in public institutions has been widely investigated doctrinally, the wearing of religious symbols in Italy has generally been neglected. Key cases are examined in light of national jurisprudence as well as intervention by the European Court of Human Rights and relevant judgments from foreign courts regarding this issue. Finally, the work considers the presence of religious symbols that transcend national borders, as in the case of arts, sport and advertising. A comparison is made with the French system which takes a very different approach. The book outlines possible ways forward in light of the growing interculturality of European societies. It will be a valuable resource for academics, researchers and policy-makers working in the areas of law and religion, and comparative law.

Art and Ventriloquism David Goldblatt, 2014-02-04 This exciting collection of David Goldblatt's essays, available for the first time in one volume, uses the metaphor of ventriloquism to help understand a variety of art world phenomena. It examines how the vocal vacillation between ventriloquist and dummy works within the roles of artist, artwork and audience as a conveyance to the audience of the performer's intentions, emotions and beliefs through a created performative persona. Considering key works, including those of Nietzsche, Foucault, Socrates, Derrida, Cavell and Wittgenstein, Goldblatt examines how the authors use the framework of ventriloquism to construct and negate issues in art and architecture. He ponders 'self-plagiarism'; why the classic philosopher cannot speak for himself, but must voice his thoughts through fictional characters or inanimate objects and works. With a close analysis of two ventriloquist paintings by Jasper Johns and Paul Klee, a critical commentary by Garry L. Hagberg, and preface by series editor Saul Ostrow, Goldblatt's thoroughly fascinating book will be an invaluable asset to students of cultural studies, art, and philosophy.

Art, Aesthetics, and the Brain Joseph P. Huston, Marcos Nadal, Francisco Mora, Luigi F. Agnati, Camilo José Cela Conde, 2015-06-25 Humans have engaged in artistic and aesthetic activities since the appearance of our species. Our ancestors have decorated their bodies, tools, and utensils for over 100,000 years. The expression of meaning using color, line, sound, rhythm, or movement, among other means, constitutes a fundamental aspect of our species' biological and cultural heritage. Art and aesthetics, therefore, contribute to our species identity and distinguish it from its living and extinct relatives. Science is faced with the challenge of explaining the natural foundations of such a unique trait, and the way cultural processes nurture it into magnificent expressions, historically and ethnically unique. How does the human brain bring about these sorts of behaviors? What neural processes underlie the appreciation of painting, music, and dance? How does training modulate these processes? How are they impaired by brain lesions and neurodegenerative diseases? How did such neural underpinnings evolve? Are humans the only species capable of aesthetic appreciation, or are other species

endowed with the rudiments of this capacity? This volume brings together the work on such questions by leading experts in genetics, psychology, neuroimaging, neuropsychology, art history, and philosophy. It sets the stage for a cognitive neuroscience of art and aesthetics, understood in the broadest possible terms. With sections on visual art, dance, music, neuropsychology, and evolution, the breadth of this volume's scope reflects the richness and variety of topics and methods currently used today by scientists to understand the way our brain endows us with the faculty to produce and appreciate art and aesthetics.

René Magritte and the Contemporary Art René Magritte,W. van den Bussche,Provinciaal Museum voor Moderne Kunst (Ostend, Belgium),1998 The playful surrealism of Rene Magritte (1898-1967) has had a tremendous and liberating influence on the art of our day, and this book is the first to take a systematic look at that influence. Cataloging a Belgian exhibition, this volume illustrates how some 50+ contemporary artists -- including Artschwager, Louise Bourgeois, Wim Delvoye, Ian Hamilton Finlay, Boyd Webb and many more -- have, in various ways and to varying degrees, shown a conceptual kinship with Magritte's work. Special attention in the book is paid to Magritte's sculptures, which are exhibited here completely for the first time, and which were created at the end of the artist's life. These works constitute a link from Magritte's life to the present, as they were mostly cast after his death. This book even considers Magritte's legacy as reflected in such mediums as film, theater, photography, video and computer art. The book features over 200 images, as well as text by noted art critics Edward-Lucie Smith and Robert Rosenblum.

Art Mike Evans,2008 A decade-by-decade review of key events and pivotal works of art since 1960.

Client/server Programming with RPC and DCE David Gunter,Que Corporation,1995 This book will teach the user how to optimize code--specifically client/server code--that will run on a network and interface different PCs. Specific chapters show the user how to make code work the same on machines running Windows 3.1, Windows 95, Windows NT, OS/2, UNIX, or Macintosh System X software.
