Physical Anthropology, Race and Eugenics in Greece (1880s-1970s) Sevasti Trubeta, 2013-10-09 Before it became established as an academic discipline, physical anthropology emerged as a contested notion of reference to the cosmological views associated with the Darwinian theory of evolution and its implementation by the natural sciences. However, its subsequent development points to a science which made holistic claims regarding its ability to explore humankind in its entirety and to influence society, with its involvement in politics, as well as racial and eugenic concepts serving as the vehicle for doing so. This book explores the emergence of physical anthropology in the modern Greek state and its development over a period of one century from the viewpoint of the proclaimed intention of its representatives to influence societal developments. The book is the first to subject Greek racial and eugenic discourse to detailed research.

An Inventory of Archaic and Classical Poleis Mogens Herman Hansen, Thomas Heine Nielsen, 2004-11-11 This is the first ever documented study of the 1,035 identifiable Greek city states (poleis) of the Archaic and Classical periods (c.650-325 BC). Previous studies of the Greek polis have focused on Athens and Sparta, and the result has been a view of Greek society dominated by Sophokles', Plato's, and Demosthenes' view of what the polis was. This study includes descriptions of Athens and Sparta, but its main purpose is to explore the history and organization of the thousand other city states. The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya. This inventory is the work of 47 specialists, and is divided into 46 chapters, each covering a region. Each chapter contains an account of the region, a list of second-order settlements, and an alphabetically ordered description of the poleis. This description covers such topics as polis status, territory, settlement pattern, urban centre, city walls and monumental architecture, population, military strength, constitution, alliance membership, colonization, coinage, and Panhellenic victors. The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1,035 poleis included in it. The ancient Greek concept of polis is distinguished from the modern term 'city state', which historians use to cover many other historic civilizations, from ancient Sumeria to the West African cultures absorbed by the nineteenth-century colonializing powers. The focus of this project is what the Greeks themselves considered a polis to be.
