Logos Steve Madison, Wouldn't you want a religion that every logician, mathematician, philosopher, and scientist on earth could embrace, a religion fully consistent with all the points made by Kurt Gödel when he listed the 14 key religious principles he accepted? That religion already exists. It's called ontological mathematics, predicated on the principle of sufficient reason and Occam's razor, and constitutes an a priori, rationalist, analytic, deductive religion, metaphysics and physics. Mathematics explains all. Nobel laureate Paul Dirac said, God is a mathematician of a very high order and He used advanced mathematics in constructing the universe. In fact, God simply is mathematics! God is not a non-mathematical Being who sometimes does mathematics. God is a mathematical Being who does nothing but mathematics, hence IS nothing but mathematics. God is one united mathematical Mind at zero entropy, and countless competing, autonomous mathematical minds at non-zero entropy. It is this capacity of God to be both one and many, united and divided, non-entropic and entropic, cooperative and competitive, that gives our reality the characteristics it has. Galileo said, Nature is written in that great book which ever is before our eyes - I mean the universe - but we cannot understand it if we do not first learn the language and grasp the symbols in which it is written. The book is written in mathematical language, and the symbols are triangles, circles and other geometrical figures, without whose help it is impossible to comprehend a single word of it; without which one wanders in vain through a dark labyrinth. Nature is written in the God language of mathematics because God is mathematics. Bertrand Russell said, Mathematics takes us still further from what is human, into the region of absolute necessity, to which not only the world, but every possible world, must conform. God must conform to mathematics too. Therefore, God is mathematics. Religion is true. Thanks to mathematics. The time has come - for a universal rational and logical Logos religion, which at last gets rid of faith, mysticism, superstition, revelation and Mythos. We don't need priests, prophets, gurus and messiahs. We need geniuses. We need the world's top logicians and rationalists. We need the very best mathematicians, calculating the answer to the Ultimate Question of life, the universe, and everything.

Divine Thinking: Instructions in Godly Thinking Bishop L. A. Wilkerson, 2017-03-28 Divine Thinking: Instructions in Godly Thinking will provoke you to shed societal concepts and practices about how to become successful and instead embrace the thought processes of the God of the Bible to find your purpose, defeat fear, and discover the true meaning of success.

Hive Mind Dreaming Dr. Thomas Stark, John Lennon said, A dream you dream alone is only a dream. A dream you dream together is reality. OK, you want a whole new way of looking at reality. Nothing is more extraordinary than the Hive Mind. According to the theory of the Hive Mind, existence is made of nothing but minds, all packed together in the Cosmic Hive. All the minds do is dream, individually and collectively, and in doing so they generate the world we all experience. The fundamental activity of the mind is dreaming. Come inside the hive and discover how reality works.

Leap Forward Andrew Obara, 2017-10-13 This book was written for people who probably feel they never need it. Its main purpose is to motivate and encourage the reader, whoever and wherever they are, that it is possible to rise up, do better, and excel as a person. It is easy to get into the trap of daily painful existence, blaming circumstances, the environment, other people, and things around us for our negative outcomes in life. None of us love to remain poor or insignificant. We all want to achieve and attain status in life. We all love to excel, yet very few of us do. The book argues with compelling stories and evidence from history, science, society, and academia that human destiny, in its most crude form, is like a garden. When left alone, a garden only grows with useless weeds, but when good seeds are sown in it, the ground is well cultivated, the crops cared for, and the garden teeming lively with crops that feed us well. The author shares with the reader his personal experiences and those of scores of other people in the world to demonstrate the indomitable power of the human being to get better. Spiced with easy, witty poems and scores of true stories, the book convinces the reader of their power to excel. The book does this using sequential themes built around eight instructively captivating chapters as follows: 1. Leap forward and get better. 2. Use your power; you are more powerful than you think 3. Pursue excellence; it is your calling 4. Avoid mediocrity and all its roots 5. Accept that you are different 6. Dedicate yourself to service And when you do all these and you realize it is tough, 7. Take heart; the world seldom cheers excellence 8. Now do this and leap forward.

Leadership, Abridged William Russell White, 1956

Leadership William Russell White, 1951

101 Mantras for Living with Really Happier Experiences in Life Ratan Budhani, 2018-09-24 These are some of the excerpts from the book. • Why are we born? This question poses a great challenge for many of us. The best answer to this would be..... • The poor long for riches, the rich long for heaven, but the wise long for a peaceful mind. • In order to perform

optimally you need to nurture your body. You wouldn't fill your car with sludge, leave it in the garage for five years, and then expect it to win a race. • Every day you are impacting the world, and every day you are creating your life through your thoughts. Think whatever you like, big or small, rich or poor, fair or unfair, and those thoughts will strive to become the things and events of your life. It's an immutable law. • Every human action is either driven by fear or by greed. Beyond the shadow of a doubt both are negative vibrations. One of the best ways you can MAKE yourself happier, in all your attempts, is begin to come from a positive vibration and that's love. • Your expectations can literally influence your real life experiences. So be aware and consciously choose to create positive expectation with everything you do... • Do what you love and enjoyment will follow. Do what you love and you will feel more fulfilled. Do what you love and the money will seem less relevant. Do what you love, and you'll never work a day in your life. Alongside, love what you do and you come out a shining star. • Enjoy the process and be willing to accept what comes your way. No matter how successful you are, if you have not stopped to enjoy yourself along the way, your success is half-full. Secret of happiness is not found in receiving more, but in developing the capacity to enjoy more. • Mistakes come from: acting in ignorance or in innocence or through carelessness or acting hastily or acting in fear or acting in worry or acting in doubt or acting under anxiety.

Reflections on the First Multi-party Parliament, 1995-2000 Pius Msekwa, 2000 The first five years of multi-party parliamentary democracy in Tanzania was a period of adjusting to a new political system and seeking to create a new political culture. The essays in this collection are part of a civic education project designed to create a better understanding of the roles and functioning of parliament in a pluralistic or multi-party democracy. One of the aims of the project is to provide for the accommodation and tolerance of opposing views and opinions. The author is the current Speaker of the National Assembly and has vast experience in parliamentary practice and procedures.
