Villes et territoires de l'après-pétrole Collectif, 2020-08-26 Villes et territoires de l'après-pétrole expose les principes issus d'une réflexion pluridisciplinaire engagée par les membres du collectif Paysages de l'après-pétrole depuis quatre années, démontrant que l'approche paysagère est le fil conducteur de la transition énergétique et du développement durable des territoires. La démarche paysagère, au-delà de solutions en matière de transition énergétique, permet d'élaborer un « monde d'après », en conciliant enjeux économiques, respect de l'environnement et amélioration du cadre de vie et des relations humaines. Parmi ses principes : l'autonomie des territoires, le respect des diversités et équilibres naturels, la valorisation et la mise en réseau des initiatives locales, la complémentarité entre villes et campagnes, et l'intégration des énergies renouvelables dans une stratégie d'ensemble visant la construction d'un paysage vert et apaisé. Les solutions proposées, que différents territoires ont su mettre en oeuvre aux échelles de la ville comme de la campagne, sont détaillées et analysées au sein de six chapitres thématiques. Richement illustrés, ils exposent l'expertise des membres du collectif sur l'énergie, l'habitat, l'agriculture et les outils, métiers, formations et acteurs du paysage. Professionnels et étudiants de l'aménagement du territoire, élus, spécialistes en sciences politiques et sciences humaines et sociales, membres des associations culturelles, d'éducation et de solidarité sociale ou environnementale y trouveront un guide précieux pour anticiper et prendre part à l'élaboration des paysages de demain.

The protective functions of forests in a changing climate - European experience Food and Agriculture Organization of the United Nations, 2021-10-13 The objective of this publication is to present the policy and management approach of each member country on its protective forests. The goal of the member countries is to increase the resilience of mountain forests and ensure the sustainability of their protective functions for society. Each country report covers the following topics: 1) definition of protective forests; 2) characteristics of the national protective forest system; 3) challenges encountered in the management and strengthening of protective forests, including climate change impacts; 4) governance of the protective

forest system; and 5) monitoring and planning systems for protective forests. Countries have defined, characterized, and identified challenges inherent to their protective forests, and it is through their appropriate governance, management and planning that the forests are able to provide ecosystem services in a sustainable way. In the context of a changing climate, the approach has to be revisited and adapted to novel and increasingly more uncertain conditions. This review of reports from 12 countries shows that especially mountain regions in Europe are facing common challenges and that different approaches can be learnt from each another. We hope that this report may provide a basis for further actions in transboundary and international cooperation for maintaining and enhancing protective forests.

Landscape mosaics Council of Europe,2022-12-01 Landscape protection, management and planning entail rights and responsibilities for everyone. The Council of Europe Landscape Convention aims to promote the protection, management and planning of landscapes, and to organise international co-operation in this field. It applies to the entire territory of the contracting parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes considered outstanding, as well as everyday or degraded areas. This publication presents thoughts and proposals for the implementation of the convention and addresses a mosaic of key issues related to its future. It forms part of a process of reflection on major themes concerning the living environment.

Pierre et patrimoine Jean-Philippe Bigas,Gilles Martinet,2009 Cet ouvrage, qui résulte du travail collectif d'une vingtaine de spécialistes aux compétences variées, présente l'état des connaissances sur la pierre – ses provenances, son extraction, ses propriétés – et livre une vision actuelle sur la construction en pierre, ses techniques et ses règles. Tirant parti des travaux de recherche les plus récents, il fait le point sur les altérations qui affectent ce matériau et sur leur diagnostic. Il décrit enfin les principes et les méthodes de restauration et de conservation actuels, en attirant l'attention sur l'importance des opérations de suivi et d'entretien qui doivent accompagner ces interventions.
