

How Is Hdi Calculated

United Nations Development Programme

Human Development Report 2023/2024 United Nations Development Programme,2024-03-13 Today, collective action on challenges ranging from climate change mitigation to peace and security is frustratingly slow or stymied altogether. Lack of trust and polarization--both associated with insecurity--exacerbate the gridlock. Shared, interlinked global challenges, like the pandemic and its recovery, are outpacing our willingness and our institutions' capacities to respond to them. Why, despite all our riches and technologies, are we so stuck? How do we get unstuck? Is it possible to mobilize action to address globally shared challenges in a world that is intensively polarized? The 2023-2024 Human Development Report explores these issues and offers a platform for strategic discussion on how to move beyond narrow zero-sum thinking and support cooperation even as we have diverging interests and views. The e-book for this publication has been converted into an accessible format for the visually impaired and people with print reading disabilities. It is fully compatible with leading screen-reader technologies such as JAWS and NVDA.

International Income Inequality Alan Freeman,Nobuharu Yokokawa,2022-11-28 What causes inequality? This book features an international discussion on the economic causes of inequality between nations and addresses the causes and effects of world inequality and its possible remedies. Inequality has acquired the iconic status once accorded to Full Employment, Growth, and Inflation. It is not a new issue being a major preoccupation of welfare state literature and the development debates of the 1950s and intersects with debates among economic historians on The Great Divergence. The revivals of these two intersecting controversies go beyond a minor dispute on the margins of economics, to the heart of the question 'how far can we trust the market?' The chapters in this book were originally published as a special issue of The Japanese Political Economy.

Encyclopedia of Sustainable Management Samuel Idowu,René Schmidpeter,Nicholas Capaldi,Liangrong Zu,Mara Del Baldo,Rute Abreu,2023-11-21 This encyclopedia is the most comprehensive and up-to-date source of reference for sustainability in business and management. It covers both traditional and emerging concepts and terms and is fully international in its scope. More than 700 contributions of internationally renowned experts provide a definitive access to the knowledge in the area of sustainable and responsible management. All actors in the field will find reliable and up to date definitions and explanations of the key terms and concepts of management in this reference work. The Encyclopedia of

Sustainable Management represents all aspects of management and business conduct. It takes sustainability as a management concept that gives due credit to the complexity and diverging constraints in which businesses and corporations act today, and it emphasizes and focuses approaches that help ensure that today's management decisions and actions will be the basis for tomorrow's prosperity.

The Rise and Rise of Indicators Stephen Morse, 2019-05-20 This book makes indicators more accessible, in terms of what they are, who created them and how they are used. It examines the subjectivity and human frailty behind these quintessentially 'hard' and technical measures of the world. To achieve this goal, The Rise and Rise of Indicators presents the world in terms of a selected set of indicators. The emphasis is upon the origins of the indicators and the motivation behind their creation and evolution. The ideas and assumptions behind the indicators are made transparent to demonstrate how changes to them can dramatically alter the ranking of countries that emerge. They are, after all, human constructs and thus embody human biases. The book concludes by examining the future of indicators and the author sets out some possible trajectories, including the growing emphasis on indicators as important tools in the Sustainable Development Goals that have been set for the world up until 2030. This is a valuable resource for undergraduate and postgraduate students in the areas of economics, sociology, geography, environmental studies, development studies, area studies, business studies, politics and international relations.

Human Development Report 2013 United Nations Development Programme, 2013 The pace of transformations around the world is extraordinarily swift, and the consequences will be profound. The rapid emergence of the 'Global South' will transform 21st century economics and politics in ways at least as fundamental as those witnessed in the wars and technological revolutions of the 20th century. This report seeks to identify how the dynamics of power, voice and wealth in the world are changing.

Democratizing the State Ernesto Isunza Vera, Adrian Gurza Lavalle, 2024-11-04 Democratic institution-building experiences, innovative forms of social organization, and the development of multiple state-society interfaces represent a significant political phenomenon in Latin America in the last half-century. By comparing the two largest countries of the subcontinent, Brazil and Mexico, Democratizing the State examines social accountability and social control regimes. These regimes are conceived configurations of relationships between actors, organizational structures, norms, and resources, all arranged in a stable and institutionalized manner to exert social control over state actors and functions. The book addresses the contrasting characteristics and different functions through which the citizenry and civil society exert control over state action in both countries. Characterizing these experiences broadly as regimes is novel and enlightening regarding the work of practitioners and scholars on political participation, social accountability, and democracy in the global South and the global North.

Human Development Report for Central and Eastern Europe and the CIS, 1999 United Nations Development Programme. Regional Bureau for Europe and the Commonwealth of Independent States,1999 The countries of the former Soviet Union (FSU) and central and eastern Europe (CEE) are part of the new global consensus on the importance of a system of government based on a pluralistic democracy, and the need for an economic system which combines efficiency and growth with equity and human security. Almost all the CEE and Baltic countries have democratically elected regimes and in several there are open press media, civil institutions and more respect for individual liberty and human rights. In the economic area, Slovenia and Poland have recouped their losses and made plans for the future. Similarly, while the Czech Republic, Hungary and the Baltic States have to contend with numerous difficulties and uncertainties, they have made progress towards creating efficient economies.
