**Towards Green Campus Operations** Walter Leal Filho, Fernanda Frankenberger, Patricia Iglecias, Roberta Consentino Kronka Mülfarth, 2018-05-14 Matters related to sustainable development, albeit global in nature, are best handled at the local level. This line of thinking is particularly true to the higher education context, where the design and implementation of sustainability initiatives on campuses can demonstrate how a given university translates the principles of sustainable development into practice, at the institutional level. Yet, there is a paucity of specific events where a dialogue among sustainability academics and practitioners concerned with a) research, projects b) teaching and c) planning and infrastructure leading to campus greening takes place, so as to allow a transdisciplinary and cross-sectoral exchange of ideas and experiences on the issues, matters and problems at hand. It is against this background that this book has been prepared. It is one of the outcomes of the “First Symposium on Sustainability in University Campuses” (SSUC-2017) organised by the University of São Paulo in Brazil, Manchester Metropolitan University (UK), the Research and Transfer Centre “Applications of Life Sciences” of the Hamburg University of Applied Sciences (Germany), and the Inter-University Sustainable Development Research Programme (IUSDRP). This book showcases examples of campus-based research and teaching projects, regenerative campus design, low-carbon and zero carbon buildings, waste prevention, and resilient transport, among others. It also demonstrates the role of campuses as platforms for transformative social learning and research, and explores the means via which university campuses can be made more sustainable. The aims of this publication are as follows: i. to provide universities with an opportunity to obtain information on campus greening and sustainable campus development initiatives from round the world; ii. to document and promote information, ideas and experiences acquired in the execution of research, teaching and projects on campus greening and design, especially successful initiatives and good practice; iii. to introduce methodological approaches and projects which aim to integrate the topic of sustainable development in campus design and operations. This book entails contributions from researchers and practitioners in the field of campus greening and sustainable development in the widest sense, from business and economics, to arts, administration and environment.

**Sustainable Intelligent Systems** Amit Joshi, Atulya K. Nagar, Gabriela Marín-Raventós, 2021-03-06 This book discusses issues related to ICT, intelligent systems, data science, AI, machine learning, sustainable development and overall their impacts on sustainability. It provides an overview of the technologies of future. The book also discusses novel intelligent

algorithms and their applications to move from a data-centric world to sustainable world. It includes research paradigms on sustainable development goals and societal impacts. The book provides an overview of cutting-edge techniques toward sustainability and ideas to help researchers who want to understand the challenges and opportunities of using smart management perspective for sustainable society. It serves as a reference to wide ranges of readers from computer science, data analysts, AI technocrats and management researchers.

*A identificação e o estatuto jurídico das árvores* Edson Rodrigues de Oliveira, 2024-01-17 Trata-se de um estudo histórico da degradação ambiental antrópica do Planeta, intensificada pelas revoluções das descobertas industriais e guerras, aliada à formação e urbanização das cidades e arcabouço da evolução jurídica do Estado. As árvores e seus atributos são essenciais ao equilíbrio ambiental e sadia qualidade de vida dos demais seres vivos. Objetivamente as árvores são seres vivos discriminados, mormente diante de suas plurais contribuições. Desde a absorção e refletância da energia solar e cósmica até o fornecimento de alimentos, abrigos, matéria-prima, climatização, reserva de água e carbono, dentre outros. No meio urbano, as árvores são imprescindíveis. O reflorestamento, identificação, manutenção e proteção das árvores devem ser organizados e geridos pelo município com a participação popular. O modelo Belo Horizontino possui diagnóstico precário, mas é um dos melhores do País e do Mundo, considerando os resíduos arquitetônicos mais preservados da Cidade Jardim.

**Sustainable Cassava** Matthew Chidozie Ogwu, Sylvester Chibueze Izah, Alfredo Augusto Cunha Alves, Suresh Babu, 2024-05-31 Sustainable Cassava: Production, Processing, Trade, Consumption and Waste Management Strategies presents viable approaches to promote sustainability in this globally important crop, enabling future generations to benefit. Providing key insights to enhance production while limiting environmental impact, this book provides readers with foundational understanding of growing and utilizing Cassava. Cassava (*Manihot* Mill. species *Euphorbiaceae*) is a staple crop in tropical and subtropical regions of the world with diverse food and non-food value. It is a principal energy source but may be fortified to provide improved nutritional status for consumers as well as for the production of value-added products. With the growing human population, there is a need to increase global production and efficiency in trade, diversify and ensure safe consumption, maximize utilization of all cassava processing wastes, and add value to the cassava production chain through sustainable practices Presented in three parts, the first addresses cassava diversity and distribution, sustainable production

and cultivation practices, and root processing innovations of the crop. Cassava trade policies and economic value chains, food safety and use of cassava, and agro-industrial cassava products are addressed in the second part. The third part focuses on bioeconomy aspects, cassava waste quality assessment, toxicology, sanitary practices, environmental risk assessment as well as sustainable management strategies for cassava waste using biotechnological and industrial advances. Addressing the need for a unified and standardized approach for the trade, management, and utilization of cassava genetic resources, finished products, and cassava processing wastes, the book also explores policy and governance structure for addressing environmental and economic issues emanating from their use. In the lens of globalization, climate change adaptation and mitigation, and sustainable development, the contents of this book will promote the adoption of novel and advanced practices in cassava cultivation and production, harvest, use, and waste recovery or reduction and contribute to global cooling efforts. - Presents best practices and ideas from around the world, including technological advances for Cassava production and use - Focuses on sustainability throughout the lifecycle - Provides insights translatable to other tuber crops for further enhanced sustainable food security

**Manual básico de la poda y formación de los árboles forestales** BARRIO ANTA, MARCOS, CASTEDO DORADO, FERNANDO, HEVIA CABAL, ANDREA, MAJADA GUIJO, JUAN, 2008-01-01 Este libro es parte de la colección e-Libro en BiblioBoard.

*Técnicas de poda en altura* SANCHEZ-BLANCO MARTIN-ARTAJÓ, MARIA, ARIZA MORALES, ENRIQUE, MUÑOZ ÁBALOS, MARTA, CARRIZO RODRÍGUEZ, JAVIER, BARRERO BELTRÁN, JUAN, 2013-07-01 En este libro se exponen los contenidos imprescindibles para la poda de árboles en altura, desde unas pinceladas sobre los conocimientos básicos que se deben tener en cuenta a la hora de valorar la necesidad de podar un árbol, hasta los fundamentos y condicionantes que deben sustentar cualquier actuación que se vaya a realizar en la copa de un árbol. Se desarrollan a lo largo de sus textos las técnicas utilizadas en la reducción y eliminación de ramas, así como para el descenso controlado de las ramas cortadas, el apeo y las ayudas mecánicas empleadas como refuerzo estructural, refiriendo los materiales y la maquinaria necesarios para ello. Dada la complejidad y el riesgo de trabajar en el árbol, los trabajos de poda no pueden estar a cargo de aficionados sin formación, y precisamente poder hacer frente a estos retos es el objetivo fundamental de este libro, cuyos contenidos se presentan de forma esencialmente práctica y aplicada, con múltiples fotografías representativas de lo expuesto en el texto. Técnicas de poda en altura corresponde a la Unidad Formativa UF0272, incluida en el Módulo (MF1119\_2): Ejecución de trabajos en altura de árboles, correspondiente al Certificado de Profesionalidad (AGAE0108): Aprovechamientos forestales, y su contenido está adaptado al Real Decreto 1.375/2.008 que regula los Certificados de Profesionalidad en la Familia Agraria.
