**Ian Pickup**

**Foreign Economic Aid** Milton Friedman,1995 Milton Friedman argues that foreign economic aid would retard economic development and promote socialism, not democracy.

**Revisiting Metaphors in International Relations Theory** Michael P. Marks,2018-01-08 This book presents an analysis of how metaphors are essential elements in the study of international relations. It acknowledges the fact that theory and practice in international relations often rest on common metaphorical concepts which have implications for the ways people around the world pursue their lives. Because of the increased attention metaphors have received as integral elements in political discourse, there is a need to investigate metaphorical concepts that are not neutral in their implications for understanding international relations. Inasmuch as government policy is shaped by metaphorical concepts that originate in the academic realm, and given that scholarly works are therefore partially involved in inspiring policy, the author subjects a range of metaphors in international relations theory to critical interrogation.

*Unmasking the African Ghost* Cyril Orji,2022-04-26 The story of Africa is a ghost story with two plots. One is foreign or imported and the other indigenous or local. The foreign plot has its origin in colonial history. The indigenous plot is African in origin. But both plots end in the same place: African trauma and culture complex. These narratives create in modern Africa a splintered consciousness and the political and economic conditions that lead to physical and psychological violence. *Unmasking the African Ghost* is both a theological exploration of the reasons the political and economic systems in African countries have failed and a proposal for the paths toward recovery, anchored in the belief that Africa is a continent continuously trying to redefine its identity in the face of Eurocentrism. For the church in Africa to be a church at the service of its people, theology in Africa must take misery and oppression as the context for its reflections and its reconstruction of the social order. An African solution to African problems must be able to meet the needs of the time. It must look to the African past to draw from its riches--particularly the African sociopolitical ethic of ubuntu. It must also look ahead and draw from the best available sociopolitical system of modern states: liberal democracy. A hybrid of these two yields ubuntuocracy. Ubuntuocracy removes the ghosts of both Africa and its Western colonizers and begins a new story that can help Africa survive its double bind.

*Aid Power and Politics* Iliana Olivie,Aitor Pérez,2019-07-25 *Aid Power and Politics* delves into the political roots of aid policy, demonstrating how and why governments across the world use aid for global influence, and exploring the role it plays in present-day global governance and international relations. In reconsidering aid as part of international relations, the book argues that the interplay between domestic and international development policy works in both directions, with individual countries having the capacity to shape global issues, whilst at the same time, global agreements and trends, in turn, shape the political behaviour of individual countries. Starting with the background of aid policy and international relations, the book goes on to explore the behaviour of both traditional and emerging donors (the US, the UK, the Nordic countries, Japan, Spain, Hungary, Brazil, and the European Union), and then finally looks at some big international agendas which have influenced donors, from the liberal consensus on democracy and good governance, to gender equality and global health. *Aid Power and Politics* will be an important read for international development students, researchers, practitioners and policy makers, and for anyone who has ever wondered why it is that countries spend so much money on the well-being of non-citizens outside their borders.

**Routledge Library Editions: Development Mini-Set B: Aid** Various,2022-07-30 Routledge Library Editions: Development will re-issue works which address economic, political and social aspects of development. Published over more than four decades these books trace the emergence of development as one of the most important contemporary issues and one of the key areas of study for modern social science. The books cover the most important themes within development and include studies of Latin America, Africa and Asia. Authors include Sir Alexander Cairncross, W. Arthur Lewis, Lord Peter Bauer and Cristobal Kay. An extensive collection of previously hard to access or out of print books, this set presents an unrivalled opportunity to build up a wealth of material in the field of development studies, with a particular focus upon economic and political concerns. The volumes in the collection offer both a global overview of the history of development in the twentieth century, and a huge variety of case studies on the development of individual nations.
