Ranking of researchers and scientists in Greece in 2017 according to Google Scholar database Giorgos P.

Kouropoulos,2017-07-22 Scope: The classification of researchers and scientists in Greece in a unified list based on the citation impact and dissemination level of their scientific work according to Google Scholar database Classification criteria: First criterion is h-index. In the case of equal h-index, the following scientometric indicators are used for the classification. The number of total citations, the i10-index, the total impact factor of scientist, the m-index or m-quotient of scientist. Information resource: The h-index, citations and i10-index derived from the public profiles of researchers in the Google Scholar database. In addition, the calculation of total impact factor and m-index of each researcher is carried out using the data from the Google Scholar database. Methodology: Researchers and scientists accounts in the Google Scholar are detected by official domain names of institutions, universities and other organizations of public and private sector. The institution, university and organization of each researcher is defined by domain of email address that have been validated in the Google Scholar. In the next step, the values of h-index, citations and i10-index are recorded from profiles of researchers. If necessary, the total number of uploaded scientific articles and the dates of first published and last published article of researcher are recorded, these data are required for calculation of total impact factor and m-index of each researcher. In the final step, the classification of all researchers and scientist according to h-index and citations number, i10-index, impact factor and m-index is carried out.

Scientific impact indicators of teaching staff of Greek universities and higher educational institutions for 2017 according to Scopus Giorgos P. Kouropoulos,2017-12-30 Scope: The classification of the permanent and non-permanent scientific and teaching staff of universities and applied universities - technological educational institutions which belong to the higher education sector in Greece. The classification take place in a single list and is based on the citation impact, bibliometric and other scientometric indicators according to Scopus database. Classification criteria: The first criterion for the classification is h-index indicator. In the case of equal h-index indicator between two or more professors, the following bibliometric indicators will be used for each paper author/professor: The number of total citations, the number of

included papers in Scopus platform, the total impact factor, the number of citable papers/documents cd and finally the λc ratio. Information resource: Information related to the h-index indicator, number of citations, number of indexed articles and number of citable documents, are collected by the individual public profiles of professors in the Scopus platform. In addition, the calculation of total impact factor and λc ratio of each professor is carried out using the data of the Scopus platform. Methodology: The first step includes the search of the names of members of permanent and non permanent teaching staff for each faculty of all universities and higher educational institutions in Greece via their official web pages. The second step consists of two parts. The first part deals with search of the names of each member on the Scopus platform in Latin characters and the second part deals with identification and matching of each Scopus profile with the corresponding member of teaching staff for each faculty. In the third step follows the typing and transfer of numerical values, bibliometric indicators and other data from Scopus platform to the computer file and next the calculation of parameters cd and λc . During the fourth step, the classification process is carried out via Microsoft excel according to the above criteria. In the last fifth step, the real names of professors and authors are masked using a special function of the software, due to personal data purposes. Sampling data: The sampling period varied from 02/08/2017 to 06/12/2017, more analytically see Table 2. Totally, a sample consisting of 8715 members of teaching staff of higher educational institutions was collected according to the above step 1 through 3. Sampling error is equal to $\pm 1.07\%$ in 95% confidence interval. Conclusions: There are 6144 members of permanent and non permanent teaching staff with $h\text{-index} \geq 5$ and totally 8715 members of Greek universities and higher educational institutions with $h\text{-index} \geq 0$. The average h-index for the sample of 6144 members is calculated to $14.8 \pm 0.9\%$ and the average number of citations for the same sample is calculated to $1221 \pm 2.9\%$. The average h-index for the sample of 8715 professors is calculated to $11.1 \pm 0.9\%$ and the average number of citations for the same sample is calculated to $872 \pm 2.9\%$.

Oncogene-Induced Senescence Vassilis G. Gorgoulis, Maria Cavinato, Konstantinos Evangelou, 2025-03-13 This volume explores a collection of the most recent experimental approaches for the detection, modelling, characterization, and in-depth computational analysis of the biological phenomenon known as Oncogene-Induced Senescence (OIS). The chapters in this book cover topics such as protocols to study OIS in two-dimensional, three-dimensional, and in vivo (animal and human) settings; analyzing OIS using high-throughput bioinformatics; and discriminate OIS from aging. Published in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step and readily reproducible laboratory protocols, and tips on troubleshooting to avoid known pitfalls. Comprehensive and authoritative, *Oncogene-Induced Senescence: Methods and Protocols* is a valuable resource for basic researchers and clinicians in the oncology field, and a great guide for computational scientists.

Clinical Genitourinary Pathology Andreas C. Lazaris, 2018-07-13 This book presents clinicopathological insights into

common genitourinary diseases, especially those of neoplastic nature, and introduces experiential learning based on case presentations (case-based learning). One of the tasks that trainees face is converting the extensive amount of data into medical experience. Using successive microscopic images, the book gradually and analytically presents diagnostic procedures for the genitourinary system (kidney, urinary bladder, prostate gland and testis). Characteristic cases are presented for each organ, each ending with a clinical commentary and key messages. This form of presentation helps readers acquire the valuable skill of effective diagnostic thinking, focusing their attention on the essential microscopic findings and disregarding insubstantial findings. Although clinical applications are frequently based on pathological findings which therefore need to be clearly described and recorded, the importance of this in everyday medical practice is often ignored by medical students and downplayed by clinicians. Demonstrating how knowledge can be practically applied, the book is a valuable resource mainly for residents in pathology, urology and oncology but also for medical students with a special interest in histopathology.

University of Athens Source Wikipedia,2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 171. Chapters: National and Kapodistrian University of Athens faculty, University of Athens alumni, Nikos Kazantzakis, Theodoros Angelopoulos, Odysseas Elytis, Georgios Papanikolaou, Panagiotis Kondylis, Eleftherios Venizelos, Konstantinos Karamanlis, Archbishop Christodoulos of Athens, Nicholas A. Orthodontic Aligner Treatment Theodore Eliades,Athanasios E. Athanasiou,2020-11-13 For almost 20 years, clear

aligners have seen growing popularity in addressing patients' demands for orthodontic treatment that is also discreet and esthetically inconspicuous. Especially for the adult patient, these almost invisible systems are in considerable demand. Supported by solid clinical evidence, this new work introduces and discusses all the presently available thermoplastically formed products that apply a predetermined strain to the teeth and jaw, with the goal of correcting malpositioned teeth, while also being esthetically acceptable for the patient. Key Features: More than a dozen contributions by top international experts Includes the most recent guidelines on clinical management with aligners Scientific approach presents evidence from material properties research, forces generated with aligners, and treatment outcome assessments Valuable information on changes in oral microbiota, potential side effects, biocompatibility, and more Orthodontic Aligner Treatment will be welcomed by all orthodontic specialists, as well as graduate students, researchers, and clinical faculty in the field.

Nationale Und Kapodistrias Universitt Athen: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. Nationale Und Kapodistrias Universitt Athen : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Nationale Und Kapodistrias Universitt Athen : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
