Strategic Human Rights Litigation Helen Duffy, 2018-09-06 Strategic human rights litigation (SHRL) is a growing area of international practice yet one that remains relatively under-explored. Around the globe, advocates increasingly resort to national, regional and international courts and bodies 'strategically' to protect and advance human rights. This book provides a framework for understanding SHRL and its contribution to various forms of personal, legal, social, political and cultural change, as well as the many tensions and challenges it gives rise to. It suggests a reframing of how we view the impact of SHRL in its multiple dimensions, both positive and negative. Five detailed case studies, drawn predominantly from the author's own experience, explore litigation in a broad range of contexts (genocide in Guatemala; slavery in Niger; forced disappearance in Argentina; torture and detention in the 'war on terror'; and Palestinian land rights) to reveal the complexity of the role of SHRL in the real world. Ultimately, this book considers how impact analysis might influence the development of more effective litigation strategies in the future.

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species, followed by urgent but largely unheeded calls for action. An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation, Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable assumptions that define the human-wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial, and territorial levels, from the Species at Risk Act to the Biodiversity Strategy, Protected Areas Network, and provincial management plans, this volume shows that wildlife policies are as much - or more - about human needs, priorities, and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation, and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral

components of complex ecological systems. A passionate critique of contemporary wildlife policy, *The Subjugation of Canadian Wildlife* calls for belief-change as the best hope for an ecologically healthy, wildlife-rich Canada.

Corporate Law and Climate Change Andrew Clarke, 2024-08-26 This book provides an analysis of the impact of the climate crisis on corporate law and theory in the coming decades as the world seeks to meet the target of net zero carbon emissions by 2050. Net zero targets are a particular challenge for an economy such as Australia which has a historical reliance on fossil fuels, and powerful interests arguing for the continued use of coal and gas. The book examines four recent corporate case studies in Australia. The first two follow the Adani group of companies and coal in Queensland and Rio Tinto and the destruction of ancient rock shelters in the midst of iron ore mining in WA. The book then covers the pension fund member Mark McVeigh, issuing proceedings against REST super in relation to long-run investment decisions and the need to take into account climate risk. Finally, it discusses Sharma, a representative action taken by school children against the Federal government in relation to expansion plans in relation to fossil fuels alleging breach of the duty of care. These case studies highlight some of the key trends and challenges in the intersection between corporate activity and the need to account for climate risk and adaptation, with Australia as a G20 economy having much to contribute to the global debate. The book will be of interest to students and researchers in the field of climate and environmental law, as well as corporate law and theory.

Explanation Within the Bounds of Religion Wilko van Holten, 2003 This book deals with the question of whether religious worldviews fulfil an explanatory function in the lives of believers. After rebutting some common objections to this claim, the author proposes to understand the explanatory nature of religious belief along the lines of inference to the best explanation. This proposal is qualified in view of the peculiar nature of religious belief: It is stressed that the type of explanation concerned occurs within the bounds of religion alone, and loses its sense apart from the religious form of life. In unfolding his argument, the author draws heavily on ideas of explanation developed in the philosophy of science, pointing to differences and comparisons between religious and scientific explanations. The author concludes by considering some specific things that theism explains.
