Summary of Deborah Blum's *The Poisoner's Handbook* Everest Media, 2022-06-13T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The city's coroner, Patrick Riordan, was trying to fast-talk himself out of charges that he showed up for work drunk. He had been accused of sneering at bodies during an accident eight hours after the crash. #2 Mors was a nurse at a German Odd Fellows home in Yonkers. He was asked to help with the removal of some of the sickest residents, and he decided to poison them. He first tried arsenic, but the elderly man he selected did not die in an orderly fashion. #3 Chloroform was a popular sedative and sleep aid. It was used to treat hiccupping, seasickness, colic, vomiting, and diarrhea. It was also used to rob occupied homes, chloroform being a potent poison. #4 The more doctors used chloroform, the more they realized that it was a capricious kind of anesthesia. It was riskier for children, the elderly, and alcoholics, but it also killed healthy adults.

International Handbook of Threat Assessment J. Reid Meloy, Jens Hoffmann, 2013-11-05 Threat assessment is a method used by mental health and law enforcement professionals to assess the risk of intended violence toward a specific target, such as attacks and assassinations of public figures, workplace homicides, mass murders, school shootings, and acts of terrorism, both domestic and foreign. Beginning with studies by the U.S. Secret Service twenty years ago, the research and interest in this field has accelerated over the past decade with published scholarship and emerging professional organizations. *International Handbook of Threat Assessment* offers a definition of the foundations of threat assessment, systematically explores its fields of practice, and provides information and instruction on the best practices of threat assessment. The volume is divided into three sections. Section I defines the difference between threat assessment and traditional violence risk assessment and discusses threat assessment terminology and practice, contemporary understanding of threats, warning behaviors concerning targeted violence, and the legal basis of threats and targeted violence interventions. Section II elaborates on the various domains of threat assessment, such as workplace violence, public figure attacks, school and campus violence, insider threats, honor-based violence, computer-modeling of violent intent, targeted domestic violence, anonymous threats, and cyberthreats. Section III presents the functions of a number of threat assessment individuals and units, including the UK Fixated Threat Assessment Centre, the LAPD Threat Management Unit, Australia's Problem Behaviour Program, and the U.S. Navy Criminal Investigative Service, among others. This book will serve as the standard reference volume in the field of threat assessment and will be invaluable to mental health and criminal justice professionals who practice threat assessment or are interested in understanding this new field of research.

Criminology of Poisoning Contexts Michael Farrell, 2020-03-16 This accessible book examines poisoning in various contexts of international conflict. It explores the modern-day use of poison in warfare, terrorism, assassination, mass suicide, serial poisoning within healthcare, and as capital punishment. It examines a broad range of international cases from the Americas, Europe, Japan, India and more in relation to Situational Crime Prevention and its theoretical precursors, in order to explore potential prevention strategies and the ways in which perpetrators circumvent them. Case studies include analysis of attempts on the lives of Sergei and Yulia Skripal, the Tokyo subway attacks, the crimes of Dr. Harold Shipman and the Heaven's Gate and Jonestown cults. For each, the means, motive, opportunity, location, and perpetrator-victim relationship is

examined. This accessible book speaks to students of criminology and those interested in penology, careers in criminal justice, homicide detectives, anti-terrorism personnel, forensic pathologists and toxicologists.
