BTEC National Engineering Mike Tooley, Lloyd Dingle, 2010-10-29 First Published in 2010. This is a new edition of a well established book which has sold 7000 copies in its current edition, and covers all of the 6 mandatory units of the 2010 BTEC Level 3 Engineering specification. The BTEC National Engineering qualifications in the UK attract over 10,000 students per year and are recognised by industry as appropriate qualifications, giving the required skills to entrants and trainees to the Engineering industry. Key points and definitions highlight the most important concepts and hundreds of activities and worked examples help put the theory in context. Questions throughout the text, with answers provided, allow students to test their knowledge as they go, while end of unit review questions are ideal for exam revision and set course work.

Managerial Accounting Ramji Balakrishnan, Konduru Sivaramakrishnan, Geoffrey B. Sprinkle, 2008-11-10 Most managerial

accounting texts emphasize the mechanics of managerial accounting. While important, mechanics are not enough. To solve business problems, students need to understand how managerial accounting can improve decision-making, and when and where a particular tool or technique is appropriate. Balakrishnan's Managerial Accounting 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

Higher National Engineering Mike Tooley, Lloyd Dingle, 2007-06 Higher National Engineering 2nd Edition is a new edition of this extremely successful course book, covering the compulsory core units of the 2003 BTEC Higher National Engineering schemes. Full coverage is given of the common core units for HNC/D (units 1 - 3) for all pathways, as well as the two different Engineering Principles units (unit 5) for mechanical and electrical/electronic engineering, and the additional unit required at HND for these pathways (Engineering Design - unit 6). Students following the HNC and HND courses will find this book essential reading, as it covers the core material they will be following through the duration of their course. Knowledge-check questions and activities are included throughout, along with learning summaries, innovative 'Another View' features, and applied maths integrated alongside the appropriate areas of engineering studies. The result is a clear, straightforward and easily accessible text, which encourages independent study. Like the syllabus itself, this book is ideal for students progressing to HNC/HND from AVCE, as well as A-Level and BTEC National. The topics covered are also suitable reading for students following BTEC Foundation Degrees in Engineering/Technology, as well as Foundation Degrees in Engineering run by UK institutions nationwide.
