Love on the Brain Ali Hazelwood, 2022-08-23 An Instant New York Times Bestseller A #1 LibraryReads and Indie Next Pick! From the New York Times bestselling author of *The Love Hypothesis* comes a new STEM-inist rom-com in which a scientist is forced to work on a project with her nemesis—with explosive results. Like an avenging, purple-haired Jedi bringing balance to the mansplained universe, Bee Königswasser lives by a simple code: What would Marie Curie do? If NASA offered her the lead on a neuroengineering project—a literal dream come true after years scraping by on the crumbs of academia—Marie would accept without hesitation. Duh. But the mother of modern physics never had to co-lead with Levi Ward. Sure, Levi is attractive in a tall, dark, and piercing-eyes kind of way. And sure, he caught her in his powerfully corded arms like a romance novel hero when she accidentally damseled in distress on her first day in the lab. But Levi made his feelings toward Bee very clear in grad school—archenemies work best employed in their own galaxies far, far away. Now, her equipment is missing, the staff is ignoring her, and Bee finds her floundering career in somewhat of a pickle. Perhaps it's her occipital cortex playing tricks on her, but Bee could swear she can see Levi softening into an ally, backing her plays, seconding her ideas...devouring her with those eyes. And the possibilities have all her neurons firing. But when it comes time to actually make a move and put her heart on the line, there's only one question that matters: What will Bee Königswasser do?

Love, Theoretically Ali Hazelwood, 2023-06-13 Rival physicists collide in a vortex of academic feuds and fake dating shenanigans in this delightfully STEM-inist romcom from the New York Times bestselling author of *The Love Hypothesis* and *Love on the Brain*. The many lives of theoretical physicist Elsie Hannaway have finally caught up with her. By day, she's an adjunct professor, toiling away at grading labs and teaching thermodynamics in the hopes of landing tenure. By other day, Elsie makes up for her non-existent paycheck by offering her services as a fake girlfriend, tapping into her expertly honed people-pleasing skills to embody whichever version of herself the client needs. Honestly, it's a pretty sweet gig—until her

carefully constructed Elsie-verse comes crashing down. Because Jack Smith, the annoyingly attractive and arrogant older brother of her favorite client, turns out to be the cold-hearted experimental physicist who ruined her mentor's career and undermined the reputation of theorists everywhere. And he's the same Jack Smith who rules over the physics department at MIT, standing right between Elsie and her dream job. Elsie is prepared for an all-out war of scholarly sabotage but...those long, penetrating looks? Not having to be anything other than her true self when she's with him? Will falling into an experimentalist's orbit finally tempt her to put her most guarded theories on love into practice?

As a third-year Ph.D. candidate, Olive Smith doesn't believe in lasting romantic relationships—but her best friend does, and that's what got her into this situation. Convinced that Olive is dating and well on her way to a happily ever after was always going to take more than hand-wavy Jedi mind tricks: Scientists require proof. So, like any self-respecting biologist, Olive panics and kisses the first man she sees. That man is none other than Adam Carlsen, a young hotshot professor—and well-known ass. Which is why Olive is positively floored when Stanford's reigning lab tyrant agrees to keep her charade a secret and be her fake boyfriend. But when a big science conference goes haywire, putting Olive's career on the Bunsen burner, Adam surprises her again with his unyielding support and even more unyielding...six-pack abs. Suddenly their little experiment feels dangerously close to combustion. And Olive discovers that the only thing more complicated than a hypothesis on love is putting her own heart under the microscope.

Below Zero Ali Hazelwood, 2022-07-05 From the New York Times bestselling author of *The Love Hypothesis* comes a new steamy, STEM-inist novella... It will take the frosty terrain of the Arctic to show these rival scientists that their chemistry burns hot. Mara, Sadie, and Hannah are friends first, scientists always. Though their fields of study might take them to different corners of the world, they can all agree on this universal truth: when it comes to love and science, opposites attract and rivals make you burn... Hannah's got a bad feeling about this. Not only has the NASA aerospace engineer found herself injured and stranded at a remote Arctic research station—but the one person willing to undertake the hazardous rescue mission is her longtime rival. Ian has been many things to Hannah: the villain who tried to veto her expedition and ruin her career, the man who stars in her most deliciously lurid dreams...but he's never played the hero. So why is he risking everything to be here? And why does his presence seem just as dangerous to her heart as the coming snowstorm? To read Mara and Sadie's stories look for the novellas *Under One Roof* and *Stuck with You* available now from Berkley!

Stuck with You Ali Hazelwood, 2022-06-07 From the New York Times bestselling author of *The Love Hypothesis* comes a new steamy, STEM-inist novella... Nothing like a little rivalry between scientists to take love to the next level. Mara, Sadie, and Hannah are friends first, scientists always. Though their fields of study might take them to different corners of the world, they can all agree on this universal truth: when it comes to love and science, opposites attract and rivals make you burn... Logically, Sadie knows that civil engineers are supposed to build bridges. However, as a woman of STEM she also understands that variables can change, and when you are stuck for hours in a tiny New York elevator with the man who broke your heart, you earn the right to burn that brawny, blond bridge to the ground. Erik can apologize all he wants, but to quote her rebel leader—she'd just as soon kiss a Wookiee. Not even the most sophisticated of Sadie's superstitious rituals could have predicted such a disastrous reunion. But while she refuses to acknowledge the siren call of Erik's steely forearms or the way his voice softens when he offers her his sweater, Sadie can't help but wonder if there might be more layers to her cold-hearted nemesis than meet the eye. Maybe, possibly, even burned bridges can still be crossed.... To read Mara and

Hannah's stories look for the novellas *Under One Roof*, available now, and *Below Zero*, coming soon from Berkley!

A scientist should never cohabitate with her annoyingly hot nemesis—it leads to combustion. Mara, Sadie, and Hannah are friends first, scientists always. Though their fields of study might take them to different corners of the world, they can all agree on this universal truth: when it comes to love and science, opposites attract and rivals make you burn... As an environmental engineer, Mara knows all about the delicate nature of ecosystems. They require balance. And leaving the thermostat alone. And not stealing someone else's food. And other rules Liam, her detestable big-oil lawyer of a roommate, knows nothing about. Okay, sure, technically she's the interloper. Liam was already entrenched in his aunt's house like some glowering grumpy giant when Mara moved in, with his big muscles and kissable mouth just sitting there on the couch tempting respectable scientists to the dark side...but Helena was her mentor and Mara's not about to move out and give up her inheritance without a fight. The problem is, living with someone means getting to know them. And the more Mara finds out about Liam, the harder it is to loathe him...and the easier it is to love him. A razão do amor (Sucesso do TikTok) Ali Hazelwood, 2022-11-01 No novo livro da autora best-seller de *A hipótese de amor*, uma cientista será obrigada a colaborar com seu rival em um projeto de proporções interestelares, e os resultados prometem ser explosivos. “Seu mundo está prestes a ser abalado.” – Elena Armas, autora de *Uma farsa de amor* na Espanha A carreira de Bee Königswasser está indo de mal a pior. Quando surge um processo seletivo para liderar um projeto de neuroengenharia da Nasa, ela se faz a pergunta que sempre guiou sua vida: o que Marie Curie faria? Participaria, é claro. Depois de conquistar a vaga, Bee descobre que precisará trabalhar com Levi Ward – um desafio que a mãe da física moderna nunca precisou enfrentar. Tudo bem, Levi é alto e lindo, com olhos verdes incríveis. E, aparentemente, está sempre pronto para salvá-la quando ela mais precisa. Mas ele também deixou bastante claro o que pensa de Bee quando os dois estavam no doutorado: rivais trabalham melhor quando estão cada um em sua própria galáxia, muito, muito distantes. Quando o projeto começa a ficar conturbado, Bee não sabe se é seu córtex cerebral lhe pregando peças, mas pode jurar que Levi está apoiando suas decisões, endossando suas ideias... e devorando-a com aqueles olhos. Só de pensar nas possibilidades, ela já fica com os neurônios em polvorosa. Quando chega a hora de se decidir e arriscar seu coração, só há uma pergunta que realmente importa: o que Bee Königswasser fará?
