European Comics in English Translation Randall William Scott, 2002 European comic authors produced a steady stream of comic material throughout the twentieth century, but gained the world's notice in 1975 when the French magazine Metal Hurlant was founded. A new generation of artists and writers had begun. Soon publishers were producing translations of the new comics into other languages, including English, and comics creators everywhere were inspired to innovation. This is a reference work, arranged by artist or writer, to European comics from the last quarter of the twentieth century that have been translated from any European language into English. It contains a variety of material, from the innocent imperialism of Herge's Tintin to the sadistic murder for hire in Bernet's Torpedo. Albums by a single creator or artist-and-writer team of European origin are the focus; comics in periodicals and anthologies with multiple contributors are excluded. Each entry provides a plot abstract and various notes about the original comic. An author index provides brief biographical information. There is a comprehensive general index.

The Encyclopedia of Fantasy John Clute, John Grant, 1999-03-15 Like its companion volume, The Encyclopedia of

Science Fiction, this massive reference of 4,000 entries covers all aspects of fantasy, from literature to art.

Morbus Gravis 2 Paolo Eleuteri-Serpieri, 1991

Coping with the Future Hans Christian Garmann Johnsen, Halvor Holtskog, Richard Ennals, 2018-03-21 Coping with the Future has been written in response to widespread international awareness that the future is not predictable. In political and economic terms, we are in unknown territory, with daily developments around Brexit and the Trump Presidency, and Kodak moments in business. On the other hand, business leaders demand certainty, which is not available. This book redefines the nature of modern business. In contrast to recent trends, it has a focus on human-centred manufacturing and on decision-making which goes beyond a focus on short-term profit. The liberal capitalism of the USA and the UK is not the only current variety of capitalism. Business is not just about managers, but requires participation and engagement by workers. Since the financial crash of 2008, there has been much talk about the need for fresh approaches to business, but little has changed. This book pulls together current research and practice and poses new questions based on case studies. There is no one simple best way, but an uncertain future can be addressed, drawing on diverse past experience and cases. The book addresses an intended audience in business and universities, including business schools, around the world. The debate takes a broader approach, involving research in the social sciences and approaches from philosophy. The world has always been unpredictable, but we have allowed ourselves to be comforted by convenient myths. It is time to wake up.
