**Howard Dubowitz**

*Introduction to Health Care Management* Sharon B. Buchbinder, Nancy H. Shanks, Bobbie J Kite, 2019-10-14 *Introduction to Health Care Management, Fourth Edition* is a concise, reader-friendly, introductory healthcare management text that covers a wide variety of healthcare settings, from hospitals to nursing homes and clinics. Filled with examples to engage the reader's imagination, the important issues in healthcare management, such as ethics, cost management, strategic planning and marketing, information technology, and human resources, are all thoroughly covered. Guidelines and rubrics along with numerous case studies make this text both student-friendly and teacher-friendly. It is the perfect resource for students of healthcare management, nursing, allied health, business administration, pharmacy, occupational therapy, public administration, and public health.

Child Maltreatment, An Issue of Pediatric Clinics Howard Dubowitz, 2014-11-22 Pediatric primary care provides a unique opportunity to tackle child abuse and neglect. In the United States in particular, primary care is a well-established system, and most children have multiple visits, especially in the first few years. There is typically a very good relationship between parents and health professionals, who are respected experts on children. The interested pediatrician, thus, has a remarkable entrée into the workings of a family, its shortcomings, and its strengths. With some knowledge and skill, pediatricians can play a pivotal role, even in a few strategic minutes. We know, however, that some professionals feel very uncomfortable becoming involved in this unpleasant area and may be deterred from taking any action. Understandable as this may be, it can jeopardize a child's health and safety. Hopefully, this issue of *Pediatric Clinics of North America* will help make this work a bit easier, albeit not easy. With training and support, pediatricians can equip themselves to be competent and more comfortable addressing child maltreatment. Aside from the possible forensic implications, the heart of this work is primarily about helping families take adequate or good care of their children. Indeed, helping address child abuse and neglect also helps promote children's health, development, and safety, and it is central to the rich mandate of Pediatrics.

**Health, Ethnicity, and Well-Being** Penelope J. Kinsey, PhD, 2013-10-02 This book speaks to those who influence the delivery of health care services to African Americans, especially policy makers, politicians, and health care providers whose attitudes and beliefs affect the extent to which provided services are effective, reliable, humane, and compassionate. In addition, the purpose is to be of use to a full range of professionals who provide education, health care, and social services for African Americans, irrespective of the program, the service, or the professional discipline. The goal is to facilitate cultural competence in health care delivery.

**Islamophobia and Psychiatry** H. Steven Moffic, John Peteet, Ahmed Zakaria Hankir, Rania Awaad, 2018-12-17 The book begins by covering the general and clinical challenges that are unique to Muslims, drawing from an internationally, ethnically, and intergenerationally diverse pool of experts. The text covers not only how psychiatrists and other clinicians can intervene successfully with patients, but how we as clinicians can have a role in addressing other societally connected mental health challenges arising from Islamophobia. The text addresses three related but distinct areas of interest: Islamophobia as a destructive force, Islam as a religion that is threatened by stigma and misinformation, and the novel intersection of these forces with the field of psychiatry. Islamophobia and Psychiatry is a vital resource for all clinicians and clinicians in training who may encounter patients struggling with these issues, including adult and child psychiatrists, psychologists, primary care physicians, counselors, social workers, and others.

Foundations of Nursing Barbara Lauritsen Christensen, Elaine Oden Kockrow, 2003 An ideal companion text to Adult

Health Nursing, this clearly-written, colorful, and attractively-designed resource has all the fundamentals and skills - maternal and neonatal, pediatric, geriatric, mental health, community, and leadership content - needed to educate LPN/LVNs. Used together, these two texts provide all the content covered in the entire LPN/LVN curriculum. Skills for a wide range of nursing care are presented in a straightforward, step-by-step format with nursing actions and rationales clearly defined. Clinical Pathways are discussed and explained. Nursing Care Plans include critical thinking questions and are developed around specific case studies with an emphasis on patient goals and outcomes. The nursing process is applied consistently and logically to the discussion of disorders, and appears in complete summary form at the end of applicable chapters. Nursing Diagnoses paired with disorder-appropriate Nursing Interventions are screened and highlighted. Therapeutic Dialogue boxes focus on communication through real-life examples of nurse-patient dialogue. Patient Teaching boxes examine discharge instructions and health promotion for patients and families. Home Health Considerations boxes discuss issues facing patients and caregivers in the home care setting. Older Adult Considerations boxes bring a gerontologic perspective to the analysis of specific disorders. Cultural and Ethnic Considerations boxes teach students about specific cultural preferences and how to address the needs of cultural diversity when planning nursing care. Medications tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs.
