Screen, Diagnose, Manage and Monitor Yogarabindranath Swarna Nantha, 2025-12-02 This peer-reviewed book complements the decision-making process of busy clinicians at a primary care, outpatient, or ambulatory setting. The book is designed to provide clinicians with quick-fire answers to common clinical problems using a one-glimpse algorithm for each topic. The algorithm serves as a quick access or desk reference containing information that is aligned to a much more detailed companion text. The book targets an international audience, driven by an extensive synthesis of international guidelines for each topic, making it customizable. The algorithm is meant to introduce a basic scaffolding that can be tailored to meet the demands of local practice, aided by a simplified reference text curated from well established guidelines. The content of this book is designed to provide and preserve clinically relevant information against a backdrop of continuous advancements in technical knowledge that usually require constant updates. To that end, the Editor and authors have carefully crafted experience-based roadmaps in the form of algorithms that could potentially remain timeless, forming the foundation for future decision-making processes to be built upon thus keeping pace with scientific progress and contemporary practices. Screen, Diagnose, Manage and Monitor - A GP Primer to Common Clinical Conditions is a collaborative effort (between clinicians and academics from different universities and practice-based clinics) initiated by Monash University.

Endoscopic Surgery of the Lacrimal Drainage System Livio Presutti, Francesco Mattioli, 2015-11-16 This manual covers all aspects of endoscopic surgery of the lacrimal drainage system. Step-by-step descriptions are provided of endoscopic dacryocystorhinostomy (DCR) and its use in revision surgery, accompanied by numerous helpful photographs and anatomical drawings. In addition, clear flow charts are included to aid in diagnostic and surgical decision making and identify surgical indications. Essential information is provided on anatomy, physiology and pathology and an individual chapter is devoted to imaging of the lacrimal drainage system. Further topics include lacrimal probes and stents, potential complications of surgery, and endoscopic DCR in the pediatric age group. This book will assist the practitioner in negotiating the steep learning curve involved in gaining the skills needed to perform endoscopic surgery of the lacrimal drainage system, which offers significant advantages in terms of avoidance of external incisions and maintenance of the lacrimal pump.

Lacrimal Surgery John V. Linberg, 1988 This manual is designed to cover the full spectrum of surgery of the tear ducts and glands, from the basic methods important to the general ophthalmologist to the most complex procedures done by the oculoplastics subspecialist.
