**Urban Competitiveness in Developing Economies** Peter Karl Kresl,2020-06-08 Plenty has been written on the competitiveness of megacities, capital cities, and regional hubs. Cities in developing countries have not yet received the same attention - this book fills that gap. An international team of expert academics have come together to present a comprehensive study of the competitiveness of cities in the developing world. Spanning Asia, Africa, and Latin America, this book homes in on specific city cases and examines how they relate to the rest of the global economy. The focus is on acknowledging their unique contexts, while drawing out commonalities, and ultimately identifying ways for them to enhance their competitiveness, wellbeing, and sustainability. This volume will be valuable reading to advanced students, researchers, and policymakers in urban and regional studies, economic geography, and economic development.

Internet Resources and Services for International Real Estate Information Sheau-Yu J. Chao,2001-02-28 You're investing in real estate, relocating to a new state, or maybe moving to a new country. You go to the Internet, an endless source of information. But is it current? Is it accurate? Can you even find what you need? Here is an analytic guide to nearly 2000 real estate Web sites. Data for more than 220 regions, states, and countries are divided into six sections representing the major continents. The book runs the gamut with data resources for broad geographical regions right down to individual localities (including U.S. states). Indexes to Web site titles, key content, sponsors, and country of origin make this guide essential to everyone from real estate practitioners (developers, bankers, and investors, etc.) to students and researchers in the field.

*The Political Economy of Bank Regulation in Developing Countries* Emily Jones,2020 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. International banking standards are intended for the regulation of large, complex, risk-taking international banks with trillions of dollars in assets and operations across the globe. Yet they are being implemented in countries with nascent financial markets and small banks that have yet to venture into international markets. Why is this? This book develops a new framework to explain regulatory interdependence between countries in the core and the periphery of the global financial system. Drawing on in-depth analysis of eleven countries

across Africa, Asia, and Latin America, it shows how financial globalisation generates strong reputational and competitive incentives for developing countries to converge on international standards. It explains how specific cross-border relations between regulators, politicians, and banks within developing countries, and international actors including investors, peer regulators, and international financial institutions, generate regulatory interdependence. It explains why some configurations of domestic politics and forms of integration into global finance generate convergence with international standards, while other configurations lead to divergence. This book contributes to our understanding of the ways in which governments and firms in the core of global finance powerfully shape regulatory decisions in the periphery, and the ways that governments and firms from peripheral developing countries manoeuvre within the constraints and opportunities created by financial globalisation.

Capitalism and Freedom in African Political Philosophy Grivas Muchineripi Kayange, 2020-05-05 This book investigates 'capitalism and freedom'—the guiding forces of many political systems—in African philosophy. It builds on classical and neoliberal capitalism rooted in private property and freedom, and argues for the presence of these elements in the traditional and modern African political systems. The author argues that while these elements are partly imported from Western capitalists, they are equally traceable in African traditional political systems. Kayange argues that African politics is marred by a conflict between embracing capitalism and freedom (individualism), on the one hand, and socialism founded on African communitarianism and communist ideas, on the other. This conflict has affected policy development and implementation, and has significantly contributed towards the socio-economic and ethical crises that are recurrent in most of the African countries.

**The Bright Continent** Dayo Olopade, 2014-03-04 "For anyone who wants to understand how the African economy really works, The Bright Continent is a good place to start" (Reuters). Dayo Olopade knew from personal experience that Western news reports on conflict, disease, and poverty obscure the true story of modern Africa. And so she crossed sub-Saharan Africa to document how ordinary people deal with their daily challenges. She found what cable news ignores: a continent of ambitious reformers and young social entrepreneurs driven by *kanju*—creativity born of African difficulty. It's a trait found in pioneers like Kenneth Nnebue, who turned cheap VHS tapes into the multimillion-dollar film industry Nollywood. Or Ushahidi, a technology collective that crowdsources citizen activism and disaster relief. A shining counterpoint to conventional wisdom, The Bright Continent rewrites Africa's challenges as opportunities to innovate, and celebrates a history of doing more with less as a powerful model for the rest of the world. "[An] upbeat study of development in Africa . . . The book is written more in wonder at African ingenuity than in anger at foreign incomprehension." —The New Yorker "A hopeful narrative about a continent on the rise." —The New York Times Book Review

*The Oxford Handbook of Industrial Policy* Arkebe Oqubay, Christopher Cramer, Ha-Joon Chang, Richard Kozul-Wright, 2020-10-20 Industrial policy has long been regarded as a strategy to encourage sector-, industry-, or economy-wide development by the state. It has been central to competitiveness, catching up, and structural change in both advanced and developing countries. It has also been one of the most contested perspectives, reflecting ideologically inflected debates and shifts in prevailing ideas. There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues, prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus (and its descendants), the slow economic recovery of many advanced economies after the 2008 global financial crisis, and mounting anxieties about the national consequences of globalization. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy. The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy, macro-economic policies, infrastructure development, human capital, and political economy. By combining historical and theoretical perspectives, and integrating conceptual issues with empirical evidence drawn from advanced, emerging, and developing countries, The Handbook offers valuable lessons and policy insights to policymakers, practitioners and researchers on developing productive transformation, technological capabilities, and international competitiveness. It addresses pressing issues including climate change, the gendered dimensions of industrial policy, global governance, and technical change. Written by leading international thinkers on the subject, the volume pulls together different perspectives and schools of thought from neo-classical to structuralist development economists to discuss and highlight the adaptation of industrial policy in an ever-changing socio-economic and political landscape.

**Internet Resources and Services for International Finance and Investment** Qun G. Jiao, Emma Guest, Lewis-Guodo Liu, 2001-03-30 AIDS has ravaged Africa, South of the Sahara, the epidemic is catastrophic. Every day seventeen hundred South Africans contract HIV, and in Botswana over a third of adults are infected. With the death toll ever increasing, this book explores how governments, charities and families are responding to the next wave of the crisis--millions of orphaned children.
