Landscapes and Narratives of PhD by Publication Sin Wang Chong, Neil Johnson, 2022-09-27 This book includes theoretical, conceptual, empirical, and reflective discussions on issues and experiences pertaining to PhD by Publication for both the prospective and retrospective route. It features formal work alongside reflections on stakeholders' experiences and addresses formal primary research and research syntheses which survey the landscapes of PhD by Publication regarding its policies, thesis and student experience. The book provides personal, context-specific and in-depth insider's perspectives towards PhD by Publication and offers a holistic understanding of micro- and macro-level issues by offering research and personal insights. 'Despite being in existence for over 20 years, the route to PhD is still often poorly understood by individuals and institutions. This lively, personal, informative, and affirming text will change that. Recognising the value and expansion of the route to a PhD by publication, and the current lack of published advice, Chong and Johnson have drawn together accounts by supervisors, student and graduates of their experiences of PhDs by publication, and what they learnt that will make the journey easier for others. Containing advice about how to apply, how to select publications, and how to prepare for the viva, it will be a valuable handbook for students and supervisors alike. Full of insights that will resonate with many research students and supervisors, and not only those involved in the 'by publication' route, it will help with tackling perennial barriers such as finding time to write, managing 'imposter syndrome;', and addressing the loneliness that many PhD student experience. An immensely useful, direct, profound and inspiring collection.' Professor Shân Wareing, Deputy Vice Chancellor, University of Northampton

It also examines the role of AI in product development, marketing, and sales, and how it can be used to drive innovation and growth. The book also examines the risks and challenges associated with the integration of AI into business operations. It explores the ethical and legal implications of AI, including issues related to data privacy and security, bias in algorithms, and the impact of AI on employment and the labor market. It also examines the role of government and policymakers in regulating AI and managing the risks associated with its integration into business operations. Overall, this book provides a comprehensive and balanced perspective on the potential and risks of AI for modern enterprises.
