How to Write a Business Plan in Ten Steps Paul Borosky MBA,2020-02-02 As a doctoral candidate, business consultant, and business plan writer, I am often asked by aspiring and seasoned entrepreneurs alike, What is the first step for starting a business (or expanding a current operation)?. When I first started out as a business consultant, I would explain to my client their place in the entrepreneurial process. I then support this analysis with proven academic and practicing business theory, along with recommending specific steps to take to start or expand their operations. After going through this process time and time again with entrepreneurs, it dawned on me that the first step I ALWAYS recommend is writing a business plan. Unfortunately, most entrepreneurs do not know how to write a professionally polished and structured business plan. Hell, most owners don't know how to write any type of business plan at all. From this issue, I decided to write this book focused on a ten-step process for writing a well-structured business plan. The business plan writing steps include all aspects of the business plan writing process, beginning with developing the executive summary to constructing a professional and polished funding request. In each step, I introduce you to a different business plan section. I then explain in layman's terms what the section means, offer a real world business plan sample, and analyze the sample to help you understand the component. The objective of this detailed process is to ensure a full understanding of each section and segment, with the goal of you being able to write a professional business plan for yourself by yourself! IF you still need help writing your business plan, at the end of the book, I ALSO supply you with professionally written samples to use. Samples include a restaurant business plan, retail business plan, coffee shop business plan, AND a Food Truck business plan for you to use. On a final note, to put the cherry on top, I have conducted and included preliminary market research for each one of the industries noted above for you to use in your personalized plans! In the end, I am supremely confident that this book, with the numerous tools and tips for business plan writing, will help you develop your coveted business plan in a timely fashion.

small business? Let's face it, writing a business plan is boring! Most people would rather go to the dentist for a root canal than sit down and write a business plan. But if you run your own business, it's going to be hard to get anywhere without a plan. Want a business loan? The bank manager will want to read your plan and look at where you will spend the money. Want to expand? Your potential partners will want to read your plan and understand how will take market share from your competitors. Want to sell? Your buyers will want to read your plan and find out what the business is really worth. You get the picture; if you are in business, you need a business plan. Now just because writing a business plan is boring does not mean it has to be hard. You can take the hard work out of planning by using a business plan template. In this book, Allard Colley gives you six different business plan templates. These plans cover just about any business that you need to plan for. Allard starts out with a simple questionnaire to decide which is the best plan for you. He then guides you through your plan, step by step. All you need to do is answer the questions and fill in the blanks - it is as simple as that. Before you know it, you have completed your first draft without even trying.
