Sound of the Crowd: a Discography of the '80s (Fourth Edition) Steve Binnie, 2018-11-05 SOUND OF THE CROWD: A DISCOGRAPHY OF THE '80s is the ultimate record collector's guide to the 1980s. In the era of multi-formatting, picture discs, coloured vinyl, multiple remixes, funny shaped records and tiny CDs you could lose down the back of the sofa, this book lists every format of every single, EP and album released in the UK in the 1980s by over 140 of the decade's biggest acts, from ABBA to Paul Young. This fourth edition has been fully revised and expanded to include even more acts than ever before, with additional sections to cover Band Aid-style charity congregations and compilation albums from the early '80s K-Tel efforts through to the Now That's What I Call Music series and its competitors. Compiled by Steve Binnie, editor of the '80s music website Sound of the Crowd and writer, producer and co-host of the unconventional '80s chart show Off The Chart, broadcast weekly on Mad Wasp Radio.

Indexing and Retrieval of Non-Text Information Diane Rasmussen Neal, 2012-10-30 The scope of this volume will encompass a collection of research papers related to indexing and retrieval of online non-text information. In recent years, the Internet has seen an exponential increase in the number of documents placed online that are not in textual format. These documents appear in a variety of contexts, such as user-generated content sharing websites, social networking websites etc. and formats, including photographs, videos, recorded music, data visualizations etc. The prevalence of these contexts and data formats presents a particularly challenging task to information indexing and retrieval research due to many difficulties, such as assigning suitable semantic metadata, processing and extracting non-textual content automatically, and designing retrieval systems that speak in the native language of non-text documents.

Art and Reality John Anderson,2017-05-31 Art and Reality is a collection of general theoretical reflections and particular critical studies, in which John Anderson asserts the essential role of art and aesthetics in intellectual life. Rejecting the notion that artistic appreciation is simply a matter of spontaneous response or 'personal taste', Anderson argues that genuine criticism requires the application of general aesthetic principles and an awareness of the relationship between art and nature. In exploring how beauty is experienced and defined, he considers a wide range of authors, from Homer to Joyce, Melville to Dostoevsky, Shakespeare to Shaw. He outlines his underlying theory of aesthetics and offers commentary on some key controversies of his day, including psychoanalytic criticism, the Ern Malley hoax, and the censorship of Ulysses in Australia. With characteristic rigor and originality, Anderson proposes a philosophical way of approaching works of art, one which can lead us to a more meaningful and thoughtful engagement with literature.
