The Poems of Leopardi Giacomo Leopardi, 2013-12-19 First published in 1923, this book presents the complete text of Giacomo Leopardi's *Canti* in the original Italian with facing-page English translation, along with extensive critical notes. The text also contains a biographical introduction, appendices and a detailed bibliography. This book will be of value to anyone with an interest in Leopardi, Italian literature and the Romantic movement in general.

Believing in Dante Alison Cornish, 2022-06-30 Alison Cornish offers a compelling new take on the *Commedia* with modern sensibilities in mind. *Believing in Dante* re-examines the infernal dramas of Dante's masterpiece that alienate and perplex modern readers, offering an invigorating view of the whole *Divine Comedy*, bringing it to meaningful life today. Addressing the characteristics that distance an author like Dante from the modern world, Alison Cornish shows the value of critically and constructively engaging with texts that do not coincide with current worldviews. She thereby reveals how we might discover constellations by which to navigate the process of reading. Written with incisiveness and sophistication, this landmark book elucidates Dante's eminently readable universe: one where we can and must choose what we want to believe.

From Sign to Signing Wolfgang G. Müller, Olga Fischer, 2003 This volume, a sequel to *Form Miming Meaning* (1999) and *The Motivated Sign* (2001), offers a selection of papers given at the Third International Symposium on Iconicity in Language and Literature (Jena 2001). The studies collected here present a number of new departures. Special consideration is given to the way non-linguistic visual and auditory signs (such as gestures and bird sounds) are represented in language, and more specifically in 'signed' language, and how such signs influence semantic conceptualization. Other studies examine more closely how visual signs and representations of time and space are incorporated or reflected in literary language, in fiction as well as (experimental) poetry. A further new approach concerns intermedial iconicity, which emerges in art when its medium is changed or another medium is imitated. A more abstract, diagrammatic type of iconicity is again investigated, with reference to both language and literature: some essays focus on the device of reduplication, isomorphic tendencies in word formation and on creative iconic patterns in syntax, while others explore numerical design in Dante and geometrical patterning in Dylan Thomas. A number of theoretically-oriented papers pursue post-Peircean approaches, such as the application of reader-response theory and of systems theory to iconicity.

*Dante* John J. Guzzardo,1987 The importance of numerological thought for Dante is evident from the emphasis which he places upon numbers in his major works the Vita nuova and the Commedia. This book is concerned with the intimate relationship between numbers and the interpretive process. It examines numerological revelations in the Vita nuova and in the episodes of the noble castle, of Ulysses, and of Ugolino in the Commedia. The text is completed by a list of meanings for symbolic numbers in the Middle Ages taken from classical and patristic sources.
