Using Technology with Elementary Music Approaches Amy M. Burns, 2020 Do you find it challenging to integrate technology into your elementary music classroom? Do you feel that it could enhance your classroom experience if you could implement it in an approachable and realistic way? In *Using Technology with Elementary Music Approaches*, author Amy M. Burns offers an all-in-one, classroom-vetted guide to integrate technology into the music classroom while keeping with core educational strategies. In this book, you will find practical lessons and ideas that can be used in any elementary classroom, whether that classroom has one device per educator or a device for every student. Written for a range of experience levels, lessons further enhance classrooms that utilize the approaches of Feierabend, Kodály, Orff Schulwerk, and project-based learning. Experts from each field—Dr. Missy Strong, Glennis Patterson, Ardith Collins, and Cherie Herring—offer a variety of approaches and project ideas in the project-based learning section. Complemented by a companion website of lesson videos, resource guides, and more, *Using Technology with Elementary Music Approaches* allows new and veteran educators to hit the ground running on the first day of school.

*Copyright in the Music Industry* Volker Lehmann,2010-10 Master's Thesis from the year 2005 in the subject Law - Comparative Legal Systems, Comparative Law, grade: 53(60), Université Paul Cézanne Aix - Marseille III, course: European Master in Law and Economics, language: English, abstract: Copyright protection in the media and especially in the music industry is a widely discussed topic since several years. In fact new technologies based on Internet changed the situation for the classic business model of the music labels dramatically. CDs become more and more superfluous with the advent of digital media and thus the traditional business model producing and selling them. The music industry of course makes these new technologies responsible for their decline in sales while others argue that the new technologies moreover offer great opportunities for the industry to expand their markets. However I will not join the discussion whether online file sharing is responsible for the decline in record sales<sup>2</sup>. I rather will show that the new technologies being introduced offer great chances for new ways of producing and distribution of music, no matter the impact it has on the old and outdated business models by selling CDs. In my thesis I try to give some insights into the current dilemma, discuss the most appealing proposals advanced by legal and economic scholars and, finally, provide my own suggestions without neglecting the current political circumstances. Therefore I will give some background information of what is actually going on right now in the markets for music in the second chapter. Then I will shed some light on the basic foundations of copyright, its economic impacts and of course its inefficiencies according the music business. After having analyzed the economic consequences of current copyright laws I will introduce and comment on some recent suggestions to ameliorate the inefficiencies. This will be proposals from single changes of particular parts of copyright to radical abandonment of copyright law at all. In ord
