The German Prosecution Service Shawn Marie Boyne, 2013-11-19 Acclaimed as the the most objective prosecutors in the world, the German prosecution service has long attracted the attention in the past of comparative law scholars. At first glance, the institutional position and statutory mandate of German prosecutors indicate that that reputation is well-deserved. Unfortunately, the introduction of charge-bargaining has opened the door to criticism that German prosecutors have abandoned their role of objective decision-makers. Using interview data collected from interviews with German prosecutors themselves as well as quantitative data, the book uses the actual voices of German prosecutors to show how real-world constraints, rather than changes in the law, undermine the ability of German prosecutors to objectively seek the truth. The book will take readers behind closed doors where prosecutors discuss case decisions and unveil the realities of practice. As a result, it will critically revise previous studies of German prosecution practices and offer readers a well-researched ethnographic analysis of actual German decision-making practices and the culture of the prosecution service. Unlike prosecutors in America's adversarial system, whom critics claim are driven by a conviction-mentality and gamesmanship, German prosecutors are institutionally positioned to function as (at least semi-)judicial officials dedicated to finding a case's

objective truth. The book argues that, organizational incentives and norms, rather than the boundaries of the law determinately shapes how prosecutors investigate and prosecute crime in Germany.

Factor X Harry Lehmann,2017-09-28 This book describes and analyses necessities for a more resource-efficient world. It discusses solutions for a more sustainable use of natural resources, addressing decision-makers and experts from the fields of policy development, industry, academia, civil society, and the media. The book presents strategies, concrete ways and examples of achieving more sustainable resource use in practice. Following on from two previous titles published on Factor X by the Umweltbundesamt (German Environment Agency), entitled “Factor X: Policy, Strategies and Instruments for a Sustainable Resource Use” (2013) and “Factor X: Re-source – Designing the Recycling Society” (2014), this book further investigates how savings in natural resources and resource efficiency improvements could be achieved, focusing on good practice examples that cover different resource categories, pursue different efficiency strategies and come from different sectors, e.g. innovative products or services, technology, management approaches, systemic approaches, etc. The background against which this work is done has a highly comprehensive span, from the first Declaration of the Factor X Club in the nineties, to the European Commission’s Roadmap to a Resource Efficient Europe that was published in September 2011, through to the German Federal government’s German Resource Efficiency Programme (ProgRess I and II) in 2012 and 2016, the G7 Alliance for Resource Efficiency, and most recently the development and implementation of the Sustainable Development Goals (SDG).
